Subject Index

- Acetylcholinesterase**
 characterization of antibodies to acetylcholinesterase in serum from patients with myasthenia gravis (Keesey et al), 132A
- Achromatopsia.** See Color blindness
- Acid-base imbalance**
 brain cellular and mitochondrial respiration in media of altered pH (Holtzman et al), 422A
- Acquired immune deficiency syndrome.** See AIDS
- ACTH.** See Corticotropin
- Ad hoc reviewers**
 Ad hoc reviewers, NOTICE, 1
- Adenosine triphosphatase**
 membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50
- Adenosine triphosphatase, calcium**
 myopathy caused by a deficiency of Ca^{2+} -adenosine triphosphatase in sarcoplasmic reticulum (Brody's disease) (Karpati et al), 38
- Adrenal cortex hormones**
 chronic inflammatory demyelinating polyneuropathy of infancy: a corticosteroid-responsive disorder (Sladky et al), 76
- Adrenoleukodystrophy**
 adrenoleukodystrophy: close linkage to a recombinant DNA probe (Aubourg et al), 137A
 new dietary regimen that lowers plasma C26:0 levels in adrenoleukodystrophy (Moser et al), 145A
 peripheral nervous system in neonatal adrenoleukodystrophy (Nigro et al), 445A
- Age factors**
 is mitochondrial inheritance in dominant ataxia deleterious? (Awh et al), 150A
 neurosurgery in the elderly (Laws and Laws), 128A
 spontaneous intracerebral hemorrhages in the young (Tof fol et al), 156A
 spontaneous subarachnoid hemorrhage in young adults (Biller et al), 154A
- Agnosia**
 case of verbal auditory agnosia with subsequent loss of speech treated successfully with anticonvulsants (Borkowski and Lotz), 417A
- AIDS**
 brain localization of LAV/HTLV-III infection in the AIDS dementia complex (Pumarola-Sune et al), 142A
 choline acetyltransferase activity is reduced in the AIDS dementia complex (Navia et al), 142A
 CNS involvement in infants and children with AIDS (Belman et al), 405A
 degeneration of the fasciculus gracilis in patients with AIDS (Rance et al), 142A
 further observation on the AIDS encephalopathy: the role of iron metabolism (Kairam et al), 443
 HIV specific antibodies and antigens in the cerebrospinal fluid of children with acquired immunodeficiency syndrome (AIDS) and AIDS-related complex (ARC) (Epstein et al), 433A
 IgG specific for HTLV-III is synthesized intra-blood-brain barrier (BBB) in patients with neurological symptoms associated with AIDS and AIDS related complex (ARC) (Tourtellotte et al), 164A
 immunohistochemical identification of HTLV-III antigen in brains of patients with AIDS (Gabuzda et al), 289
 polymyositis, viruses, and immunodeficiency: a distinct association (Dalakas et al), 142A
 primary central nervous system lymphoma in acquired immune deficiency syndrome: a clinical and pathological study (So et al), 566
 primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 98
 progressive multifocal leukoencephalopathy in patients with acquired immune deficiency syndrome: study of the infection by in situ hybridization methods (Greenlee and Stroop), 141A
 quantitative study of the AIDS dementia complex using positron emission tomography and ^{18}F -fluorodeoxyglucose (Moeller et al), 128A
- Alcohol amnestic disorder**
 three-dimensional mapping of local cerebral perfusion in two distinct types of alcoholic encephalopathy (Meyer et al), 155A
- Alkaloids**
 taxol produces a predominantly sensory neuropathy (Lip-ton et al), 132A
- Aluminum poisoning**
 possible role of aluminum toxicity in atypical motor neuron disease (Ross et al), 130A
- Alzheimer's disease**
 age of onset of dementia in Parkinson's and Alzheimer's disease and the role of levodopa (Gandy et al), 150A
 Alzheimer's disease: alterations of aminergic-cholinergic synaptic markers in subregions of hypothalamus (Sparks et al), 124A
 another look at physostigmine in Alzheimer's disease (Stern et al), 130A
 aphasia in senile dementia of the Alzheimer type (Faber-Langendoen et al), 125A
 cerebral perfusion in presenile and senile Alzheimer's disease (Prohovnik et al), 127A
 cholinergic muscarinic binding by human lymphocytes: changes with aging, antagonist treatment, and senile dementia of the Alzheimer type (Rabey et al), 628
 clinical diagnosis of Alzheimer's disease: relative sensitivity of various mental status and neurological examination test items (Strub and Black), 129A
 clinical features of familial and nonfamilial Alzheimer's disease and senile dementia of the Alzheimer's type (Reyes et al), 129A
 glucose metabolism and rate constants in Alzheimer's disease examined with dynamic PET scan (Fukuyama et al), 125A
 hippocampal glutamate receptors in Alzheimer's disease: implication for Down's syndrome (Geddes et al), 430A
 magnetic resonance imaging in patients presumed to have early Alzheimer's disease (Heyman et al), 125A
 monoaminergic systems in Alzheimer's and Parkinson's diseases (D'Amato et al), 129A
 nerve growth factor and Alzheimer's disease (Hefti and Weiner), NEUROLOGICAL PROGRESS, 275
 neurofibrillary degeneration of cholinergic and noncholinergic neurons of the basal forebrain in Alzheimer's disease (Rasool et al), 482
 neuropeptides in neurological disease (Beal and Martin), NEUROLOGICAL PROGRESS, 547

July issue, pp 1-170; August issue, pp 171-274; September issue, pp 275-446; October issue, pp 447-546; November issue, pp 547-650; December issue, pp 651-788.

- neuropeptide Y immunoreactivity is reduced in cerebral cortex in Alzheimer's disease (Beal et al), 282
- perforant pathway changes and the memory impairment of Alzheimer's disease (Hyman et al), 472
- platelet membrane fluidity: an antemortem marker for Alzheimer's disease (Zubenko et al), 128A
- postmortem study of amino acid neurotransmitters in Alzheimer's disease (Ellison et al), 616
- reduced phospholipase D activity in brain tissue samples from Alzheimer's disease patients (Kanfer et al), 265
- reductions in corticotropin-releasing factor-like immunoreactivity in cerebral cortex in Alzheimer's disease, Parkinson's disease, and progressive supranuclear palsy (Whitehouse et al), 125A
- reductions of mitochondrial, glycolytic, and cholinergic enzymes in subcortical areas in Alzheimer's disease brain (Sandro et al), 130A
- saccadic eye movement dysfunction in Alzheimer's disease (Fletcher and Sharpe), 464
- somatostatin, neuropeptide Y, NADPH diaphorase neurons do not contain neurofibrillary tangles in Alzheimer's disease cortex (Kowall et al), 124A
- vacuolar change in the brains of patients with Alzheimer's disease and its relation to Creutzfeldt-Jakob disease (Smith et al), 126A
- vasoactive intestinal peptide immunoreactivity in Alzheimer cerebral cortex (Mazurek et al), 126A
- vasopressin in Alzheimer's disease: a study of postmortem brain concentrations (Mazurek et al), 665
- widespread reduction of somatostatin-like immunoreactivity in the cerebral cortex in Alzheimer's disease (Beal et al), 489
- Aminobutyric acids**
- heterogeneity of clinical manifestations in 4-hydroxybutyric aciduria (Gibson et al), 141A
- postmortem study of amino acid neurotransmitters in Alzheimer's disease (Ellison et al), 616
- Aminopyridines**
- demyelinated motor and sensory fibers: differential effects on 4-aminopyridine (Bowe et al), 137A
- 4-aminopyridine administered orally improves clinical signs in multiple sclerosis (Davis et al), 152A
- Amisriptyline**
- amisriptyline and nortriptyline plasma concentrations in the treatment of childhood migraines (Woody and Kearns), 432A
- Amphetamines**
- single photon emission computed tomography with N-isopropyl (I-123) iodoamphetamine (IMP) in cerebrovascular disease (Saxena et al), 122A
- Amyloid**
- amyloid plaques in Creutzfeldt-Jakob disease stain with prion protein antibodies (Kitamoto et al), 204
- Amyotrophic lateral sclerosis**
- autonomic hypersensitivity to thyrotropin releasing hormone (TRH) infusion in amyotrophic lateral sclerosis (ALS) patients with bulbar involvement (Brooks et al), 132A
- DNA repair in lymphocytes from familial ALS patients and their offspring as estimated by the alkaline elution technique (Tandan et al), 134A
- endocrine pancreas in amyotrophic lateral sclerosis and Parkinson's disease (Davis et al), 153A
- linkage and genetic analysis in amyotrophic lateral sclerosis (Siddique et al), 136A
- Mill's progressive ascending paralysis—MRI study (Fisher), 153A
- plateaus in the course of amyotrophic lateral sclerosis (Carosio et al), 133A
- Analgesia**
- cerebrospinal fluid pharmacokinetics of intrathecal morphine sulfate and D-Ala²-D-Leu⁵-enkephalin (Moulin et al), 218
- Andersen's disease.** See Glycogenosis IV
- Anemia, sickle cell**
- neuropathological findings in sickle cell anemia (Rao et al), 432A
- sickle cell anemia and central nervous system infarction: a neuropathological study (Rothman et al), 000
- sickle cell disease, cerebral hyperemia, and stroke (Prohovnik et al), 432A
- sickle cell disease, MRI, and stroke (Pavakis et al), 432A
- "vascular" headache in sickle cell disease (Pavakis et al), 407A
- Anesthesia**
- pattern of recovery from barbiturate anesthesia for refractory status epilepticus (Lowenstein and Simon), 120A
- Angiography**
- reclassification of acute stroke with nondiagnostic computed tomography and angiogram: infarction of undetermined cause in the NINCDS stroke data bank (Sacco et al), 157A
- Anoxia**
- increased glucose metabolism causes cerebral acidosis during hypoxia (Lockwood et al), 155A
- Antibodies**
- anticerebellar antibodies in sera of patients with paraneoplastic cerebellar degeneration: studies of antibody specificity and response to plasmapheresis (Greenlee et al), 139A
- Antibodies, monoclonal**
- cell surface markers for diagnosis of central nervous system involvement in lymphoproliferative diseases (Ernerudh et al), 610
- pathogenetic effects of antiacetylcholine receptor antibody in myasthenia gravis: analysis by monoclonal antibody (Gomez and Richman), 163A
- plasma exchange-induced improvement in demyelinating neuropathy associated with a monoclonal IgG antibody to a neuronal glycolipid (Ross et al), 131A
- Anticonvulsants**
- case of verbal auditory agnosia with subsequent loss of speech treated successfully with anticonvulsants (Borkowski and Lotz), 417A
- discontinuing antiepileptic drugs improves intellectual function (Vining et al), 389A
- phenytoin: mechanisms of its anticonvulsant action (Yaari et al), NEUROLOGICAL PROGRESS, 171
- predictors of success for drug discontinuation following neonatal seizures (Brod et al), 434A
- withdrawal of sedative anticonvulsant drugs in persons with mental retardation: II. prospective controlled study (Coulter), 421A
- Anticonvulsants, adverse effects**
- connective tissue changes, hypersensitivity rash, and blood laboratory test changes associated with antiepileptic drug therapy (Mattson et al), 119A
- Anticonvulsants, blood**
- changes in serum anticonvulsant levels with febrile illness in children with epilepsy (Goulden et al), 388A
- Antigen-antibody complex**
- studies of immune complexes in patients with multiple sclerosis (Friedman and Zabriskie), 166A

- Apatites**
calcium apatite crystals in the mitochondria of children with ataxia (Munoz-Garcia et al), 402A
- Aphasia**
aphasia in senile dementia of the Alzheimer type (Faber-Langendoen et al), 125A
primary dysphasic dementia: clinical, pathological, and biochemical studies (Mehler et al), 126A
- Apnea**
elevated CSF beta-endorphins in apnea: treatment with naltrexone (Myer et al), 408A
hypercarbia stimulation test (HST) for pediatric brain death (Riviello et al), 442A
- Apraxia**
neuroanatomical account of limb apraxia (Helm-Estabrooks et al), 169A
- Arachidonic acids**
interference with arachidonic acid metabolism suppresses experimental allergic neuritis (Hartung et al), 168A
- Asphyxia neonatorum**
behavioral changes in mice subjected to neonatal asphyxia (Yoshioka et al), 414A
exuberant brainstem blood flow and intact cerebral blood flow despite clinical and pathological evidence for brainstem and cerebral necrosis in an asphyxiated newborn infant (Altman et al), 409A
failure of nimodipine to improve cerebral blood flow in perinatal asphyxia (Ment et al), 435A
Prader-Labhart-Willi syndrome and birth asphyxia: cause versus susceptibility (Wharton and Bresnan), 438A
prostaglandin release from asphyxiated neonatal brain (Ment et al), 410A
- Aspirin**
significant clinical valproate toxicity due to interaction with acetylsalicylic acid (Goulden et al), 427A
- Astrocytes**
astrocyte responses to growth factors (Huff and Snodgrass), 421A
pharmacological prevention of astroglial swelling produced in gray matter by experimental brain injury (Barron et al), 144A
- Astrocytoma**
demonstration of neuron-specific enolase in nonneuronal tumors using a specific monoclonal antibody (Cras et al), LETTER, 106
magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- Ataxia**
calcium apatite crystals in the mitochondria of children with ataxia (Munoz-Garcia et al), 402A
double-blind crossover trial with TRH-T in inherited ataxias (Campanella et al), 151A
infantile X-linked ataxia and deafness: a new entity? (Schmidley et al), 442A
is mitochondrial inheritance in dominant ataxia deleterious? (Awh et al), 150A
- Atherosclerosis**
carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
cognitive deficits associated with asymptomatic advanced carotid atherosclerosis (Bridgers and Delaney), 159A
- Atrial fibrillation**
prospective study of stroke associated with nonvalvular atrial fibrillation: low frequency of early recurrence (Sage), 155A
- Atrophy**
biochemical and morphological changes of the brain in a patient dying of GDH-deficient olivopontocerebellar atrophy (Plaitakis and Smith), 152A
- Attention**
adverse effects of carbamazepine on attention in children with partial seizures (Rettig et al), 386A
asymmetric lateralized attention in children (Roeltgen et al), 413A
development of a videogame-based test of attention and impulsivity (Mitchell et al), 414A
- Attention deficit disorder**
diagnosis of attention deficit disorder: development and validation of a diagnostic rule utilizing the Yale children's inventory (Shaywitz et al), 415A
effects of methylphenidate during debrisoquin loading on plasma and urinary concentrations of monoamines and their metabolites in children with attention deficit disorder (Shaywitz et al), 416A
WISC-R subtest profiles and methylphenidate response in ADD (McBride and Klorman), 412A
- Autism**
¹H NMR imaging of autistics: implications for neurobiology (Minshew et al), 417A
- Autism, infantile**
association of the fragile-X chromosome abnormality with infantile autism (Payton et al), 417A
- Autoimmune diseases**
nondextrality and autoimmune disorders are not more prevalent among relatives of language impaired children: a prospective study (Urien), 415A
sinistrality and risk for immune diseases and learning disorders: a pleiotropic gene effect? (Kinsbourne), 416A
systemic autoimmune manifestations in patients with multiple sclerosis (Aisen et al), 167A
- Autonomic nervous system diseases**
autonomic dysfunction in cardiac arrest survivors: evidence of severe vagal dysfunction (Sterman et al), 158A
- Axons, pathology**
somatofugal axonal atrophy: a sensitive early marker of axonal dysfunction (Griffin et al), 131A
- Bannwarth's syndrome. See Meningoradiculitis, lymphocytic**
- Barbiturates**
pattern of recovery from barbiturate anesthesia for refractory status epilepticus (Lowenstein and Simon), 120A
seizures during barbiturate withdrawal: relation to blood level (Theodore and Porter), 147A
- Basal ganglia**
nerve growth factor and Alzheimer's disease (Hefti and Weiner), NEUROLOGICAL PROGRESS, 275
PET scan investigations of Huntington's disease: cerebral metabolic correlates of neurological features and functional decline (Young et al), 296
pseudohyperdensity of basal ganglia: a pitfall in the CT assessment of hypoxic-ischemic cerebral injury in the young infant (Hill and Flodmark), 410A
- Basilar artery**
signs and symptoms in occlusive disease of the intracranial vertebral or basilar arteries (Caplan et al), 160A
- Behavior**
behavioral changes in mice subjected to neonatal asphyxia (Yoshioka et al), 414A
heterogeneity within the gifted: boys with higher IQ exhibit increased activity, impulsivity, and parenting problems (Shaywitz et al), 415A
- Bell's palsy. See Facial paralysis**

Benzodiazepines

Parkinson's disease: nigral receptor changes support peptidergic role in nigrostriatal modulation (Uhl et al), 194

Benzotropine

pharmacological therapy of Hallervorden-Spatz syndrome: two cases responsive to benzotropine (Torch and Humphreys), 445A

Bicuculline, adverse effects

combined ^1H and ^{31}P nuclear magnetic resonance spectroscopic studies of bicuculline-induced seizures in vivo (Petroff et al), 185

Bilirubin

acute bilirubin encephalopathy in jaundiced rats treated with sulfonamide: timing of brainstem auditory evoked potential changes (Shapiro), 393A

brainstem auditory evoked potentials in bilirubin encephalopathy (Shapiro and Hecox), 138A

developmental studies of brainstem auditory evoked potentials in jaundiced rats (Shapiro and Hecox), 395A

Biopsy

effect of muscle biopsy on leg strength in children: a retrospective and prospective study (Pearson et al), 403A

maternal muscle biopsy in severe neonatal centronuclear (myotubular) myopathy (Brenningstall and Marks), 405A

role of the conjunctival biopsy in the diagnosis of neurodegenerative disease (Resar et al), 408A

Biopterin

cerebrospinal fluid biogenic amines and biopterin in Rett's syndrome (Zoghbi et al), 433A

Blepharospasm

saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456

Blood-brain barrier

measuring IgG production within the central nervous system (Schuller and Sagar), LETTER, 373; reply (Lefvert and Link), LETTER, 373

modest serum contamination of cerebrospinal fluid (CSF) invalidates the calculation of intra-blood-brain barrier (BBB) IgG synthesis and intra-BBB albumin formation but not unique CSF oligoclonal IgG bands (Peter and Tourtellotte), 167A

Blood platelets

in vivo studies on interaction of platelets with the cerebral vessel wall in acute cerebral ischemia (Gotoh et al), 122A

platelet membrane fluidity: an antemortem marker for Alzheimer's disease (Zubenko et al), 128A

Books

Basic Mechanisms of the Epilepsies: Molecular and Cellular Approaches, (Vol 44, *Advances in Neurology*), edited by Delgado-Escueto et al (Gandy), 751

Myoclonus, (Vol 43, *Advances in Neurology*), edited by Fahn et al (Gandy), 751

Borrelia infections

immunoglobulin abnormalities in cerebrospinal fluid and blood over the course of lymphocytic meningoradiculitis (Bannwarth's syndrome) (Henriksson et al), 337

Botulinum toxins

treatment of essential blepharospasm, hemifacial spasm, and Meig's syndrome with botulinum toxin (Buckley), 121A

Botulism

botulism in a patient with jejunoileal bypass (Freedman et al), 641

Brain, anatomy

dendritic atrophy in children with Down's syndrome (Becker et al), 520

Brain, blood supply

stimulation of brain capillary endothelium by growth factors from brain (Robertson et al), 391A

Brain, growth

effects of ACTH on seizure susceptibility in the developing brain (Holmes and Weber), 82

Brain, metabolism

brain cellular and mitochondrial respiration in media of altered pH (Holtzman et al), 422A

brain high-energy phosphate metabolism during neonatal seizures complicated by hypotension (Cowan et al), 409A

cerebral glucose utilization increased during rapid eye movement sleep (Abrams et al), 401A

cerebral metabolism of 6-fluoro-L-dopa (Martin et al), 151A

critical limits of cerebral metabolic regulation in hypoxic lambs (Younkin et al), 423A

cultured human skin fibroblasts and cerebral oxidative metabolic defects: normative data and Leigh's syndrome (De Vivo et al), 423A

how does hypoglycemia affect brain energy metabolism during prolonged neonatal seizures? (Young et al), 434A

^{31}P NMR studies of brain development (Pettegrew et al), 400A

value of plasmapheresis in hepatic encephalopathy (Rivello et al), 442A

Brain, ultrastructure

distribution of neurotransmitter receptors in human fetal brain (Barks et al), 392A

regional distribution of messenger RNA in postmortem human brain: an approach to understanding hereditary degenerative diseases of childhood (Wood et al), 391A

Brain chemistry

acute high-dose methotrexate neurotoxicity in the rat (Phillips et al), 583

cerebral metabolic effects of neonatal seizures measured with in vivo ^{31}P NMR spectroscopy (Younkin et al), 513

effects of carbamazepine and its derivatives on the glutamate receptor in the central nervous system of the rat (Nadi), 148A

inhibition of L-[^{18}F]fluorodopa uptake into human brain by amino acids demonstrated by positron emission tomography (Leenders et al), 258

intravenous high dose methotrexate increases regional brain capillary permeability in the rat (Phillips et al), 139A

prostaglandin release from asphyxiated neonatal brain (Ment et al), 410A

reduced cerebral glucose metabolism and increased brain capillary permeability following high-dose methotrexate chemotherapy: a positron emission tomographic study (Phillips et al), 139A

reduced phospholipase D activity in brain tissue samples from Alzheimer's disease patients (Kanfer et al), 265

reductions of mitochondrial, glycolytic, and cholinergic enzymes in subcortical areas in Alzheimer's disease brain (Sandro et al), 130A

spontaneous intracerebral hemorrhages in the young (Tofol et al), 156A

type 2 and type 3 Gaucher disease: a morphological and biochemical study (Kaye et al), 223

Brain death

hypercarbia stimulation test (HST) for pediatric brain death (Rivello et al), 442A

Brain diseases

- acute bilirubin encephalopathy in jaundiced rats treated with sulfonamide: timing of brainstem auditory evoked potential changes (Shapiro), 393A
- antenatal white matter necrosis (Bejar et al), 436A
- biochemical and morphological changes of the brain in a patient dying of GDH-deficient olivopontocerebellar atrophy (Plaitakis and Smith), 152A
- brainstem auditory evoked potentials in bilirubin encephalopathy (Shapiro and Hecox), 138A
- cavitary periventricular leukomalacia: diagnosis, clinical course, and long-term neurological outcome (White et al), 436A
- comparison of computed tomographic and positron emission tomographic findings in olivopontocerebellar atrophy (Gilman et al), 121A
- cyclosporin associated central nervous system toxicity in renal transplant patients (Lavenstein and Stewart), 441A
- developmental studies of brainstem auditory evoked potentials in jaundiced rats (Shapiro and Hecox), 395A
- further observation on the AIDS encephalopathy: the role of iron metabolism (Kairam et al), 443
- immunohistochemical identification of HTLV-III antigen in brains of patients with AIDS (Gabuzda et al), 289
- new and characteristic diagnostic features of periventricular leukomalacia on CT scan (Hill et al), 394A
- sleep apnea resembling seizures in olivopontocerebellar degeneration: a diagnostically confusing and treatable entity (Salazar-Grueso et al), 147A
- Brain edema**
 - hemispheric brain damage in unilateral status epilepticus (Soffer et al), 737
 - risk factors for cerebral edema associated with diabetic ketoacidosis (Vlcek), 406A
- Brain injuries**
 - pharmacological prevention of astroglial swelling produced in gray matter by experimental brain injury (Barron et al), 144A
 - significance of brain swelling in hypoxic-ischemic brain injury in the term newborn (Hill et al), 435A
- Brain neoplasms**
 - demonstration of neuron-specific enolase in nonneuronal tumors using a specific monoclonal antibody (Cras et al), LETTER, 106
 - distribution of brain metastases (Delattre et al), 138A
 - phase I-II trial of preradiation high-dose intravenous methotrexate chemotherapy for newly diagnosed malignant childhood brain tumors (Allen et al), 424A
 - postoperative chemotherapy and delayed irradiation in children less than 36 months of age with malignant brain tumors (Duffner et al), 424A
 - primary central nervous system lymphoma in acquired immune deficiency syndrome: a clinical and pathological study (So et al), 566
 - primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 98
 - role of ^{11}C -L-methionine positron emission tomography (PET) in the care of children with brain tumors (O'Tuama et al), 422A
 - time course of steroid action on brain-tumor capillary permeability: a positron emission tomographic study using ^{82}Rb (Jarden et al), 139A
- Brainstem**
 - brainstem auditory evoked responses in children with brainstem glioma (Kovnar et al), 399A

- brainstem evoked potentials in the diagnosis of posterior fossa tumors in children (Baram et al), 398A
- elevated brainstem blood flow in newborn infants: a positron emission tomography study (Altman et al), 436A
- oculomasticatory myorhythmia: a unique movement disorder occurring in Whipple's disease (Schwartz et al), 677
- Brainstem, pathology**
 - neurological manifestations in xeroderma pigmentosum (Mimaki et al), 70
- Brody's disease**
 - myopathy caused by a deficiency of Ca^{2+} -adenosine triphosphatase in sarcoplasmic reticulum (Brody's disease) (Karpati et al), 38

Caffeine

- caffeine and tremor (Koller et al), 151A

Calcitonin

- localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496

Calcium

- calcium apatite crystals in the mitochondria of children with ataxia (Munoz-Garcia et al), 402A
- membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50
- role of the endothelium and calcium as mediators of hypoxic cerebral vasodilation (Ashwal and Pearce), 390A
- skinned fiber studies of patients with periodic paralysis (Ruff), 135A

Calpain II

- membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50

Capillaries

- stimulation of brain capillary endothelium by growth factors from brain (Robertson et al), 391A

Capillary permeability

- dexamethasone reverses high-dose methotrexate induced increase in regional brain capillary permeability in the rat (Phillips et al), 422A
- intravenous high dose methotrexate increases regional brain capillary permeability in the rat (Phillips et al), 139A
- time course of steroid action on brain-tumor capillary permeability: a positron emission tomographic study using ^{82}Rb (Jarden et al), 139A

Carbamazepine

- adverse effects of carbamazepine on attention in children with partial seizures (Rettig et al), 386A
- carbamazepine and eosinophilia (De Marco and Melchiori), LETTER, 274
- changes in epileptic spike configuration associated with attainment of seizure control (Frost et al), 723
- changes in serum carbamazepine or carbamazepine-10-11-epoxide levels do not alter reaction time in children with stable epilepsy (Camfield et al), 428A
- effects of carbamazepine and its derivatives on the glutamate receptor in the central nervous system of the rat (Nadi), 148A

Carbidopa

- sinemet CR4 in the treatment of responsive fluctuations in Parkinson's disease (Cedarbaum et al), 121A

Carbon dioxide, metabolism

- regional distributions of cerebral blood flow and vascular CO_2 reactivity to hypocapnia in normals and its distur-

- bances in ischemic cerebrovascular disease (Tsuda and Hartmann), 156A
- Carcinoma, oat cell
 preferential loss of large lumbar primary sensory neurons in carcinomatous sensory neuropathy (Ohnishi and Ogawa), 102
- Carnitine
 syncope due to ventricular tachycardia and its relationship to cardiomyopathy, skeletal muscle myopathy, and carnitine metabolism (Smith et al), 439A
 Type I lipid storage myopathy with carnitine deficiency presenting initially as a proximal polyneuropathy (Vuckovich), 404A
- Carotid arteries
 value of intraoperative EEG monitoring during carotid endarterectomy (Cho et al), 508
- Carotid artery, internal
 borderzone infarctions distal to internal carotid artery occlusion: prognostic implications (Bogousslavsky and Regli), 346
 carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
 sickle cell anemia and central nervous system infarction: a neuropathological study (Rothman et al), 684
- Carotid artery diseases
 cognitive deficits associated with asymptomatic advanced carotid atherosclerosis (Bridgers and Delaney), 159A
 natural history of asymptomatic carotid artery occlusive lesions (Meissner et al), 122A
 progressive and episodic weakness of the lower extremity in carotid occlusive disease (Yanagihara and Sundt), 153A
- Cell line
 transfection of human skeletal muscle cells with SV40 large T antigen gene coupled to a metallothionein promoter (Hurko et al), 573
- Cell membrane
 membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50
- Central nervous system
 CNS involvement in infants and children with AIDS (Belman et al), 405A
 measuring IgG production within the central nervous system (Schuller and Sagar), LETTER, 373; reply (Lefvert and Link), LETTER, 373
- Cerebellar ataxia
 contrapulsion of saccades and ipsilateral ataxia: a unilateral disorder of the rostral cerebellum (Ranalli and Sharpe), 311
 linkage studies in spinocerebellar ataxia (SCA) (Zoghbi et al), 401A
- Cerebellar cortex
 lectins as markers of developing human cerebellar cortex (DeGrauw et al), 390A
- Cerebellar diseases
 anticerebellar antibodies in sera of patients with paraneoplastic cerebellar degeneration: studies of antibody specificity and response to plasmapheresis (Greenlee et al), 139A
 common neuropathological lesions not visualized by cranial ultrasound in the newborn (Kairam et al), 392A
- Cerebellar neoplasms
 factors impacting on neurocognitive outcome in long-term survivors of primitive neuroectodermal tumors/medulloblastoma (PNET-MB) (Packer et al), 396A
 late recurrence of primitive neuroectodermal tumor/medulloblastoma (PNET-MB): clinical and pathological features (Ryan et al), 397A
 optimal surgery and MOPP chemotherapy in infants with PNET of the posterior fossa (Baram et al), 423A
- Cerebellum
 contrapulsion of saccades and ipsilateral ataxia: a unilateral disorder of the rostral cerebellum (Ranalli and Sharpe), 311
 morphogenesis of the cerebellar anomaly in the Chiari type II malformation (Carmel et al), 441A
 neurological manifestations in xeroderma pigmentosum (Mimaki et al), 70
 Purkinje and granule cells survive in cerebellar grafts implanted into hosts with genetically determined Purkinje or granule cell degeneration (Triarhou et al), 138A
- Cerebellum hypometabolism epilepsy and cerebellar hypometabolism (Bairamian et al), LETTER, 649
- Cerebral anoxia
 "anoxic penumbra" defined in vitro (Fairchild et al), 156A
 critical limits of cerebral metabolic regulation in hypoxic lambs (Younkin et al), 423A
 effect of phenobarbital on local cerebral glucose utilization in hypoxic newborn puppies (Pasternak and Wallace), 435A
 new model of neonatal hypoxic-ischemic encephalopathy in the mouse (Yoshioka et al), 393A
 predictors of outcome after hypoxic ischemic coma in children (Darwish et al), 431A
 pseudohyperdensity of basal ganglia: a pitfall in the CT assessment of hypoxic-ischemic cerebral injury in the young infant (Hill and Flodmark), 410A
 role of the endothelium and calcium as mediators of hypoxic cerebral vasodilation (Ashwal and Pearce), 390A
 significance of brain swelling in hypoxic-ischemic brain injury in the term newborn (Hill et al), 435A
- Cerebral arteries
 attenuation of infarct size and neurological deficit by inhibition of excitatory neurotransmission following permanent unilateral middle cerebral artery occlusion in rat (Simon et al), 154A
 posterior cerebral artery stenosis (Pessin et al), 160A
- Cerebral cortex
 hemispheric brain damage in unilateral status epilepticus (Soffer et al), 737
 neuropeptide Y immunoreactivity is reduced in cerebral cortex in Alzheimer's disease (Beal et al), 282
 postmortem study of amino acid neurotransmitters in Alzheimer's disease (Ellison et al), 616
 precocious adrenarche causes right hemisphere dysfunction? (Nass and Baker), 416A
 widespread reduction of somatostatin-like immunoreactivity in the cerebral cortex in Alzheimer's disease (Beal et al), 489
- Cerebral cortex, abnormalities
 colpocephaly (Noorani and Bodensteiner), 445A
- Cerebral cortex, metabolism
 vasoactive intestinal peptide immunoreactivity in Alzheimer cerebral cortex (Mazurek et al), 126A
- Cerebral cortex, pathology
 neurological manifestations in xeroderma pigmentosum (Mimaki et al), 70
 somatostatin, neuropeptide Y, NADPH diaphorase neurons do not contain neurofibrillary tangles in Alzheimer's disease cortex (Kowall et al), 124A

- Cerebral cortex, surgery
hemispherectomy in infancy enlarges the distribution of motor neurons in the remaining cerebral hemisphere (Huttenlocher et al), 418A
multidisciplinary prediction of seizure relief from cortical resection surgery (Dodrill et al), 2
- Cerebral cortex, transplantation
immune responsiveness to iso- and allogeneic intraventricular neural implants in the mouse (Nicholas et al), 165A
- Cerebral hemorrhage
are venous circulatory abnormalities important in pathogenesis of intraventricular hemorrhage in preterm infants? (Perlman and Volpe), 434A
common neuropathological lesions not visualized by cranial ultrasound in the newborn (Kairam et al), 392A
extension of germinal matrix hemorrhage: a cause of intraparenchymal hemorrhage in the premature infant (Roland et al), 394A
neurodevelopmental assessment of low birthweight neonates with peri- and intraventricular hemorrhage or isolated ventricular dilatation: a four-year, longitudinal, case-controlled study (Aturu et al), 395A
spontaneous intracerebral hemorrhages in the young (Tof- fol et al), 156A
subependymal and pulmonary hemorrhages in the newborn: an analysis of 514 cases (Gregorios), 158A
ultrasound grading of severe intraventricular hemorrhage in the premature infant: a poor predictor of outcome (Roland et al), 409A
- Cerebral infarction
borderzone infarctions distal to internal carotid artery occlusion: prognostic implications (Bogousslavsky and Regli), 346
cerebral granulomatous angiitis associated with isolation of human T-lymphotropic virus type III from the central nervous system (Yankner et al), 362
incidence of cerebral infarction in inherited neuromuscular conditions (Biller et al), 160A
neuropathological findings in sickle cell anemia (Rao et al), 432A
photochemically induced microvascular injury: local and remote consequences (Dietrich et al), 160A
proton magnetic resonance imaging in ischemic cerebrovascular disease (Salgado et al), 502
seizures and cerebral infarction in neonates with persistent pulmonary hypertension (Scher et al), 440A
sickle cell anemia and central nervous system infarction: a neuropathological study (Rothman et al), 684
white matter infarction: clinical, electrographic, and sonographic findings (Scher), 412A
- Cerebral ischemia
carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
effects of xanthine derivatives on erythrocyte and plasma flow in focal brain ischemia (Izumiyama et al), 161A
in vivo studies on interaction of platelets with the cerebral vessel wall in acute cerebral ischemia (Gotoh et al), 122A
ischemic cerebrovascular lesions in neonates (Scher), 395A
monoamine metabolism in the evolution of infarction in ischemic striatum (Weinberger and Nieves-Rosa), 155A
new and characteristic diagnostic features of periventricular leukomalacia on CT scan (Hill et al), 394A
new model of neonatal hypoxic-ischemic encephalopathy in the mouse (Yoshioka et al), 393A
photochemically induced microvascular injury: local and remote consequences (Dietrich et al), 160A
predictors of outcome after hypoxic ischemic coma in children (Darwish et al), 431A
pseudohyperdensity of basal ganglia: a pitfall in the CT assessment of hypoxic-ischemic cerebral injury in the young infant (Hill and Flodmark), 410A
releasable tissue plasminogen activators in ischemic stroke (Tabbaa et al), 158A
role of dopamine in ischemic striatal injury: metabolic evidence (Globus et al), 159A
significance of brain swelling in hypoxic-ischemic brain injury in the term newborn (Hill et al), 435A
signs and symptoms in occlusive disease of the intracranial vertebral or basilar arteries (Caplan et al), 160A
value of intraoperative EEG monitoring during carotid endarterectomy (Cho et al), 508
- Cerebral ischemia, transient
long-term mortality of patients with transient focal cerebral ischemia (Heyman et al), 156A
proton magnetic resonance imaging in ischemic cerebrovascular disease (Salgado et al), 502
seasonal variation in stroke rates (Sobel et al), 157A
- Cerebral palsy
antecedents of cerebral palsy (Nelson and Ellenberg), 406A
- Cerebral ventricles
CT periventricular hypodensity in multiple sclerosis: isotopic cisternography and clinical correlations (Volpi et al), 146A
dementia, ventricular enlargement, and hypertension associated with periventricular hypodensity by computed tomography (Brott et al), 129A
- Cerebrosides
cerebrospinal fluid sulfatides and cerebrosides in metachromatic leukodystrophy (Kaye et al), 424A
- Cerebrospinal fluid
cerebrospinal fluid biogenic amines and bipterin in Rett's syndrome (Zoghbi et al), 433A
cerebrospinal fluid immunoglobulins in childhood: normal values (Rust et al), 407A
cerebrospinal fluid kappa chain in multiple sclerosis: correlation with clinical and laboratory features (Rudick and Dunn), 123A
cerebrospinal fluid pharmacokinetics of intrathecal morphine sulfate and D-Ala²-D-Leu⁵-enkephalin (Moulin et al), 218
cerebrospinal fluid pleocytosis in childhood idiopathic status epilepticus (Woody et al), 427A
cerebrospinal fluid sulfatides and cerebrosides in metachromatic leukodystrophy (Kaye et al), 424A
characterization of the cerebrospinal fluid pleocytosis induced by intrathecal administration of beta-interferon (Rose and Salazar), 166A
elevated beta-endorphin levels in infants at high risk for SIDS (Myer et al), 438A
free kappa light chains in multiple sclerosis spinal fluid (Rudick et al), 63
free light chains in multiple sclerosis spinal fluid: unique electrofocusing characteristics (Bidlack et al), 166A
immunoglobulin abnormalities in cerebrospinal fluid and blood over the course of lymphocytic meningoradiculitis (Bannwarth's syndrome) (Henriksson et al), 337
Japanese encephalitis: identification of inflammatory cells in cerebrospinal fluid (Johnson et al), 691

- modest serum contamination of cerebrospinal fluid (CSF) invalidates the calculation of intra-blood-brain barrier (BBB) IgG synthesis and intra-BBB albumin formation but not unique CSF oligoclonal IgG bands (Peter and Tourtellotte), 167A
- multiple sclerosis: cerebrospinal fluid T-cell lines show natural effector cell activity (Noronha et al), 168A
- Cerebrospinal fluid proteins**
- diagnostic value of cerebrospinal fluid anti-myelin basic protein in patients with multiple sclerosis (Warren and Catz), 20
- epitopes of immunoreactive myelin basic protein in human cerebrospinal fluid (Whitaker et al), 329
- immunoreactive myelin basic protein in cerebrospinal fluid of patients with peripheral neuropathies (Cornblath et al), 370
- measurement of human myelin basic protein (MBP) peptide 45-89 in cerebrospinal fluid: a more sensitive indicator of demyelination than MBP (Gupta et al), 162A
- Cerebrovascular circulation**
- are venous circulatory abnormalities important in pathogenesis of intraventricular hemorrhage in preterm infants? (Perlman and Volpe), 434A
- cerebral blood flow and glucose metabolism in hepatic encephalopathy (Lockwood et al), 145A
- cerebral perfusion in presenile and senile Alzheimer's disease (Prohovnik et al), 127A
- dexamethasone reverses high-dose methotrexate induced increase in regional brain capillary permeability in the rat (Phillips et al), 422A
- elevated brainstem blood flow in newborn infants: a positron emission tomography study (Altman et al), 436A
- exuberant brainstem blood flow and intact cerebral blood flow despite clinical and pathological evidence for brainstem and cerebral necrosis in an asphyxiated newborn infant (Altman et al), 409A
- failure of nimodipine to improve cerebral blood flow in perinatal asphyxia (Ment et al), 435A
- localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496
- new noninvasive measurement of regional cerebral blood flow in the neonate (Halloran et al), 411A
- reduction of regional cerebral blood flow in patients with Down's syndrome (Melamed et al), 126A
- regional distributions of cerebral blood flow and vascular CO₂ reactivity to hypocapnia in normals and its disturbances in ischemic cerebrovascular disease (Tsuda and Hartmann), 156A
- sickle cell disease, cerebral hyperemia, and stroke (Prohovnik et al), 432A
- three-dimensional mapping of local cerebral perfusion in two distinct types of alcoholic encephalopathy (Meyer et al), 155A
- Cerebrovascular diseases**
- cerebrovascular disease associated with echocardiographic documented focal segmental hypokinesia and remote myocardial infarction: does a causal relation exist? (Jones et al), 159A
- delayed therapy of embolic stroke with tissue plasminogen activator (Zivin et al), 154A
- risk factors for ischemic stroke: a prospective study in Rochester, Minnesota (Davis et al), 121A
- single photon emission computed tomography with N-isopropyl (1-123) iodoamphetamine (IMP) in cerebrovascular disease (Saxena et al), 122A
- Cerebrovascular disorders**
- attenuation of infarct size and neurological deficit by inhibition of excitatory neurotransmission following permanent unilateral middle cerebral artery occlusion in rat (Simon et al), 154A
- platelet hyperaggregability in stroke and stroke-prone patients (Babikian et al), 157A
- prospective study of stroke associated with nonvalvular atrial fibrillation: low frequency of early recurrence (Sage), 155A
- real-time electroencephalographic diagnosis of stroke in term neonates (Maertens et al), 411A
- regional distributions of cerebral blood flow and vascular CO₂ reactivity to hypocapnia in normals and its disturbances in ischemic cerebrovascular disease (Tsuda and Hartmann), 156A
- releasable tissue plasminogen activators in ischemic stroke (Tabbaa et al), 158A
- seasonal variation in stroke rates (Sobel et al), 157A
- sickle cell disease, cerebral hyperemia, and stroke (Prohovnik et al), 432A
- sickle cell disease, MRI, and stroke (Pavakis et al), 432A
- stroke and Parkinson's disease (Bahamon et al), 150A
- structural determinants of electroencephalographic findings in acute hemispheric lesions (Schaal et al), 703
- vacuolar change in the brains of patients with Alzheimer's disease and its relation to Creutzfeldt-Jakob disease (Smith et al), 126A
- Cerebrovascular disorders, classification**
- reclassification of acute stroke with nondiagnostic computed tomography and angiogram: infarction of undetermined cause in the NINCDS stroke data bank (Sacco et al), 157A
- Chiari malformation**
- morphogenesis of the cerebellar anomaly in the Chiari type II malformation (Carmel et al), 441A
- Cholestasis**
- chronic cholestasis, not vitamin E deficiency, leads to abnormal visual evoked potentials, a reflection of neurological dysfunction (Norcross et al), 431A
- Cholesterol**
- role of macrophages' receptor-mediated conversion of HDL₃ to lipid-rich and apoprotein E-containing HDL₂ for cholesterol processing (Yatsu and Alam), 160A
- Cholinergic fibers**
- nerve growth factor and Alzheimer's disease (Hefti and Weiner), NEUROLOGICAL PROGRESS, 275
- neurofibrillary degeneration of cholinergic and noncholinergic neurons of the basal forebrain in Alzheimer's disease (Rasool et al), 482
- Choreoathetosis**
- sporadic paroxysmal dystonic choreoathetosis associated with basal ganglia calcifications (Micheli et al), LETTER, 750
- Chromosome abnormalities**
- adrenoleukodystrophy: close linkage to a recombinant DNA probe (Aubourg et al), 137A
- adult-onset autosomal dominant limb-girdle muscular dystrophy (Chutkow et al), 240
- linkage and genetic analysis in amyotrophic lateral sclerosis (Siddique et al), 136A
- new DNA probe tightly linked to myotonic muscular dystrophy (Roses et al), 137A
- X-linked neuropathy: gene localization with DNA probes (Fischbeck et al), 527
- Chymopapain**
- efficacy of chemonucleolysis (Javid), 146A

- Cisplatin**
brainstem auditory evoked responses (BAER), audiometry, and ototoxicity in children receiving cisplatin (Kovnar et al), 399A
- Clonidine**
clonidine in Tourette's syndrome: double-blind objective study (Goetz et al), 151A
haloperidol, fluphenazine, and clonidine in the treatment of Tourette's syndrome (Singer et al), 438A
- Clostridium botulinum***
botulism in a patient with jejunoileal bypass (Freedman et al), 641
- Cognition disorders**
cognitive deficits associated with asymptomatic advanced carotid atherosclerosis (Bridgers and Delaney), 159A
intellectual changes in asymptomatic MPTP exposed subjects (Stern et al), 170A
magnetic resonance findings, disability, and cognitive factors in multiple sclerosis (Huber et al), 170A
predictors of cognitive performance in infants with chronic renal failure (CRF) (Conry et al), 413A
- Colchicine**
colchicine suppresses murine experimental allergic encephalomyelitis (Amador et al), 163A
preliminary trial of colchicine in chronic progressive multiple sclerosis (Weinreb et al), 165A
- Color blindness**
role of luminance, saturation, and hue in achromatopsia (Rizzo et al), 140A
- Colpocephaly**
colpocephaly (Noorani and Bodensteiner), 445A
- Coma**
electrographic status epilepticus in fatal anoxic coma (Simon and Aminoff), 351
predictors of outcome after hypoxic ischemic coma in children (Darwish et al), 431A
spontaneous vertical eye movements in coma (Rosenberg), 635
- Concanavalin A**
activated suppressor cell dysfunction in chronic progressive multiple sclerosis (Antel et al), 164A
- Conjunctiva**
role of the conjunctival biopsy in the diagnosis of neurodegenerative disease (Resar et al), 408A
- Contrast media**
iopamidol as a contrast medium for neuroradiologic studies in children (Swick and Wells), 438A
- Corpus callosum**
agenesis of the corpus callosum in patients with spinal defects (Cochran and Koch), 439A
corpus callosum resection in five patients with intractable seizures and mental retardation (Murphy et al), 389A
- Corpus striatum**
elevated γ -aminobutyric acid level in striatal but not extrastriatal brain regions in Parkinson's disease: correlation with striatal dopamine loss (Kish et al), 26
maturation of pre- and postsynaptic neurotransmitter markers in baboon striatum (Singer et al), 430A
monoamine metabolism in the evolution of infarction in ischemic striatum (Weinberger and Nieves-Rosa), 155A
nerve growth factor and cholinergic differentiation in the developing corpus striatum (Mobley et al), 419A
role of dopamine in ischemic striatal injury: metabolic evidence (Globus et al), 159A
spiperone binding and dopamine levels in the striatum of MPTP treated monkeys (Alexander et al), 149A
- Corticotropin**
ACTH in the treatment of childhood seizures (Dooley et al), 388A
effects of ACTH on seizure susceptibility in the developing brain (Holmes and Weber), 82
high dose ACTH in infantile spasms and mixed seizure disorders of children: efficacy and plasma ACTH and cortisol levels (Snead et al), 419A
prospective study of outcome of infants with infantile spasms treated during controlled studies of ACTH and prednisone (Glaze et al), 419A
pyruvate carboxylase deficiency presenting with acute exacerbation after the use of ACTH for infantile spasms (Rutledge et al), 401A
- Corticotropin-releasing factor**
neuropeptides in neurological disease (Beal and Martin), NEUROLOGICAL PROGRESS, 547
- Corticotropin-releasing hormone**
reductions in corticotropin-releasing factor-like immunoreactivity in cerebral cortex in Alzheimer's disease, Parkinson's disease, and progressive supranuclear palsy (Whitehouse et al), 125A
- Coxiella***
encephalitis caused by *Coxiella burnetii* (Brooks et al), 91
Creutzfeldt-Jakob syndrome. See Jakob-Creutzfeldt syndrome
- Cyclophosphamide**
treatment of extraneural metastatic medulloblastoma with the combination of cyclophosphamide, adriamycin, and vincristine (Chamberlain and Levin), 398A
- Cyclosporins**
chronic nephrotoxicity complicating cyclosporine treatment of chronic inflammatory demyelinating polyradiculoneuropathy (Kolkin et al), 146A
cyclosporin associated central nervous system toxicity in renal transplant patients (Lavenstein and Stewart), 441A
serial immune evaluation of chronic progressive multiple sclerosis patients (Kerman et al), 166A
- Cytochrome oxidase**
cytochrome oxidase deficiency in Leigh's syndrome (Serrividei et al), 400A
- Deafness**
infantile X-linked ataxia and deafness: a new entity? (Schmidley et al), 442A
- Debrisoquin**
effects of methylphenidate during debrisoquin loading on plasma and urinary concentrations of monoamines and their metabolites in children with attention deficit disorder (Shaywitz et al), 416A
smoking, cancer, and Parkinson's disease (Barbeau et al), LETTER, 105
- Dementia**
age of onset of dementia in Parkinson's and Alzheimer's disease and the role of levodopa (Gandy et al), 150A
brain localization of LAV/HTLV-III infection in the AIDS dementia complex (Pumarola-Sune et al), 142A
choline acetyltransferase activity is reduced in the AIDS dementia complex (Navia et al), 142A
dementia, ventricular enlargement, and hypertension associated with periventricular hypodensity by computed tomography (Brott et al), 129A
dystonia, dementia, tissue edema, and cerebral mineralizations: a study by magnetic resonance imaging (Gomez et al), 124A
education, mental status errors, and prediction of dementia (Crystal et al), 127A

- familial myoclonic dementia masquerading as Creutzfeldt-Jakob disease (Little et al), 231
- long-latency evoked potential findings in demented and nondemented patients with Parkinson's disease (Goodin and Aminoff), 127A
- posterior cortical dementia (Benson), 127A
- prevalence and risk of dementia in idiopathic Parkinson's disease (Mayeux et al), 128A
- primary dysphasic dementia: clinical, pathological, and biochemical studies (Mehler et al), 126A
- prognosis of dementia in normal-pressure hydrocephalus after a shunt operation (Thomsen et al), 304
- quantitative study of the AIDS dementia complex using positron emission tomography and ^{18}F -fluorodeoxyglucose (Moeller et al), 128A
- Dementia, senile**
- aphasia in senile dementia of the Alzheimer type (Faber-Langendoen et al), 125A
- cholinergic muscarinic binding by human lymphocytes: changes with aging, antagonist treatment, and senile dementia of the Alzheimer type (Rabey et al), 628
- clinical features of familial and nonfamilial Alzheimer's disease and senile dementia of the Alzheimer's type (Reyes et al), 129A
- improved cognition after control of risk factors in multi-infarct dementia (Meyer et al), 158A
- Demyelinating diseases**
- chronic demyelinating peripheral neuropathy associated with multifocal central nervous system demyelination (Thomas et al), 123A
- chronic demyelinating peripheral neuropathy in cerebrotendinous xanthomatosis (Argov et al), 89
- chronic inflammatory demyelinating polyneuropathy of infancy: a corticosteroid-responsive disorder (Sladky et al), 76
- cultured glial cells express Theiler's virus-associated antigen on their surfaces (Rodriguez et al), 143A
- diagnostic value of cerebrospinal fluid anti-myelin basic protein in patients with multiple sclerosis (Warren and Catz), 20
- expression of major histocompatibility complex antigens in cultured human oligodendroglia (Kim), 167A
- plasma exchange-induced improvement in demyelinating neuropathy associated with a monoclonal IgG antibody to a neuronal glycolipid (Ross et al), 131A
- remyelination follows antibody-induced central nervous system demyelination (Sergott et al), 94
- somatofugal axonal atrophy: a sensitive early marker of axonal dysfunction (Griffin et al), 131A
- Dendrites**
- dendritic atrophy in children with Down's syndrome (Becker et al), 520
- Dentate gyrus**
- evidence for the generation in the adult rat dentate gyrus of neurons that extend axonal projections (Trice and Stanfield), 392A
- Depression**
- atypical depression and Parkinson's disease (Rubin et al), 150A
- relationship of serotonin to depression in Parkinson's disease (Mayeux et al), 149A
- Dexamethasone**
- dexamethasone reverses high-dose methotrexate-induced increase in regional brain capillary permeability in the rat (Phillips et al), 422A
- time course of steroid action on brain-tumor capillary permeability: a positron emission tomographic study using ^{82}Rb (Jarden et al), 139A
- Diabetic neuropathies**
- electrophysiological assessment of diabetic peripheral neuropathy (Kaplan et al), 131A
- Dicarboxylic acids**
- dicarboxylic aciduria in an infant with spinal muscular atrophy (Kelley and Sladky), 734
- Diet therapy**
- control of the "on-off" phenomenon with dietary manipulation (Pincus and Barry), 149A
- familial mitochondrial myopathy responsive to portagen diet (Patten), 133A
- new dietary regimen that lowers plasma C26:0 levels in adrenoleukodystrophy (Moser et al), 145A
- Dimethylsulfoxide**
- effect of differentiation inducers on growth characteristics of human glioblastoma cell lines (Geder et al), 140A
- Disease models, animal**
- locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
- multidisciplinary approach to a new rodent model of congenital hypothyroidism (Stein et al), 402A
- new model of neonatal hypoxic-ischemic encephalopathy in the mouse (Yoshioka et al), 393A
- Distemper virus, canine**
- incidence and prevalence of multiple sclerosis in Newfoundland and Labrador, 1960-1984 (Pryse-Phillips), 323
- DMSO. See Dimethylsulfoxide**
- DNA repair**
- DNA repair in lymphocytes from familial ALS patients and their offspring as estimated by the alkaline elution technique (Tandan et al), 134A
- Dopa**
- cerebral metabolism of 6-fluoro-L-dopa (Martin et al), 151A
- Dopamine**
- elevated γ -aminobutyric acid level in striatal but not extrastriatal brain regions in Parkinson's disease: correlation with striatal dopamine loss (Kish et al), 26
- role of dopamine in ischemic striatal injury: metabolic evidence (Globus et al), 159A
- saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456
- Down's syndrome**
- dendritic atrophy in children with Down's syndrome (Becker et al), 520
- hippocampal glutamate receptors in Alzheimer's disease: implication for Down's syndrome (Geddes et al), 430A
- myelination in Down's syndrome brains (pre- and post-natal maturation) and some clinical-pathological correlations (Wisniewski and Schmidt-Sidor), 429A
- reduction of regional cerebral blood flow in patients with Down's syndrome (Melamed et al), 126A
- Drug evaluation**
- evoked potentials predict the outcome in a multiple sclerosis drug trial (Nuwer et al), 145A
- Duchenne dystrophy. See Muscular dystrophy**
- Duodenum**
- duodenal delivery of levodopa for on-off fluctuations in parkinsonism: preliminary observations (Kurlan et al), 262
- Dysarthria**
- atypical presentation of progressive supranuclear palsy (Campbell-Taylor), LETTER, 375; reply (Davis et al), LETTER, 375
- Dyslexia**
- neuropathological findings in a woman with developmental dyslexia (Galaburda et al), 170A

- Electrical stimulation**
functional electrical stimulation in multiple sclerosis patients with chronic foot drop (Sears et al), 146A
- Electrodes, implanted**
basal temporal subdural electrodes in the evaluation of complex partial seizures (Lüders et al), 120A
chronically implanted subdural electrodes in the evaluation for epilepsy surgery in children and adults (Wyllie et al), 420A
cortical potentials related to voluntary and passive finger movements recorded from subdural electrodes in humans (Lee et al), 32
- Electroencephalography**
effects of mental status and fetal duration on the clinical visibility of EEG-proved neonatal seizures (Clancy et al), 411A
electrographic status epilepticus in fatal anoxic coma (Simon and Aminoff), 351
electrophysiological correlates of a paroxysmal movement disorder (Toro and Torres), 731
evaluation of neonates during extracorporeal membrane oxygenation with EEG and cranial ultrasonography (Streletz et al), 412A
focal spike-induced cerebral dysfunction is related to the after-coming slow wave (Shewmon and Erwin), 428A
ictal versus nonictal behaviors in childhood: a video/EEG analysis (Duchowny et al), 387A
multidisciplinary prediction of seizure relief from cortical resection surgery (Dodrill et al), 2
real-time electroencephalographic diagnosis of stroke in term neonates (Maertens et al), 411A
structural determinants of electroencephalographic findings in acute hemispheric lesions (Schaal et al), 703
value of intraoperative EEG monitoring during carotid endarterectomy (Cho et al), 508
- Electromyography**
subclasses of event-related potentials: response-locked and stimulus-locked components (Goodin et al), 603
- Electrophysiology**
electrophysiological study of autonomic dysfunction in peripheral neuropathy (Khalil et al), 136A
- Encephalitis**
adoptively transferred chronic experimental allergic encephalitis: changes in central nervous system T-cell phenotype and frequency of myelin basic protein reactive T-cells following relapse (Fallis et al), 164A
considerations about early diagnosis and prognosis in herpes simplex encephalitis (Risvegliato et al), 144A
encephalitis caused by *Coxiella burnetii* (Brooks et al), 91
immunohistochemical identification of HTLV-III antigen in brains of patients with AIDS (Gabuzda et al), 289
- Encephalitis periaxialis**
therapeutic experience with the 1912 form of Schilder's disease (Konkol et al), 444A
- Encephalitis, Japanese**
Japanese encephalitis: identification of inflammatory cells in cerebrospinal fluid (Johnson et al), 691
- Encephalitis, Rasmussen's**
Rasmussen's encephalitis: clinical recognition and surgical management (Dalos et al), 434A
- Encephalitogenic basic proteins**
adoptively transferred chronic experimental allergic encephalitis: changes in central nervous system T-cell phenotype and frequency of myelin basic protein reactive T-cells following relapse (Fallis et al), 164A
measurement of human myelin basic protein (MBP) peptide 45-89 in cerebrospinal fluid: a more sensitive indicator of demyelination than MBP (Gupta et al), 162A
myelin basic protein-specific encephalitogenic T-cell lines: generation by serial adoptive transfer in SJL mice (Fallis et al), 163A
suppression of experimental allergic encephalomyelitis by the oral administration of myelin basic protein (Higgins and Weiner), 161A
- Encephalocele**
seizures in children with myelomeningocele and/or hydrocephalus: frequency and prognosis (Noetzel and Blake), 425A
- Encephalomyelitis**
cultured glial cells express Theiler's virus-associated antigen on their surfaces (Rodriguez et al), 143A
- Encephalomyelitis, allergic**
biochemical and morphological alterations of the sympathetic innervation of lymphoid tissue in experimental allergic encephalomyelitis (Konkol et al), 391A
colchicine suppresses murine experimental allergic encephalomyelitis (Amador et al), 163A
myelin proteolipid protein induces experimental allergic encephalomyelitis (Trotter and Clark), 165A
suppression of experimental allergic encephalomyelitis by the oral administration of myelin basic protein (Higgins and Weiner), 161A
- Enderectomy**
carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
value of intraoperative EEG monitoring during carotid endarterectomy (Cho et al), 508
- Endorphins**
elevated beta-endorphin levels in infants at high risk for SIDS (Myer et al), 438A
elevated CSF beta-endorphins in apnea: treatment with naltrexone (Myer et al), 408A
Parkinson's disease: nigral receptor changes support peptidergic role in nigrostriatal modulation (Uhl et al), 194
- Endothelium**
role of the endothelium and calcium as mediators of hypoxic cerebral vasodilation (Ashwal and Pearce), 390A
- Enkephalins**
cerebrospinal fluid pharmacokinetics of intrathecal morphine sulfate and D-Ala²-D-Leu⁵-enkephalin (Moulin et al), 218
- Enolase. See Phosphopyruvate hydratase**
- Enteroviruses**
colchicine suppresses murine experimental allergic encephalomyelitis (Amador et al), 163A
- Eosinophilia**
carbamazepine and eosinophilia (De Marco and Melchiori), LETTER, 274
- Ependymoma**
PAS-positive granules in childhood ependymomas: a clinicopathological study (Taylor et al), 397A
- Epidural space**
early detection and treatment of spinal epidural metastases: the role of myelography (Rodichok et al), 696
- Epilepsy**
adverse effects associated with long-term use of valproic acid in children (Maas et al), 429A
carbamazepine and eosinophilia (De Marco and Melchiori), LETTER, 274
changes in epileptic spike configuration associated with attainment of seizure control (Frost et al), 723
changes in serum anticonvulsant levels with febrile illness in children with epilepsy (Goulden et al), 388A

- changes in serum carbamazepine or carbamazepine-10-11-epoxide levels do not alter reaction time in children with stable epilepsy (Camfield et al), 428A
- connective tissue changes, hypersensitivity rash, and blood laboratory test changes associated with antiepileptic drug therapy (Mattson et al), 119A
- epilepsy and cerebellar hypometabolism (Bairamian et al), LETTER, 649
- epilepsy in childhood renal transplantation: a 20-year experience in 135 patients (Bates et al), 426A
- quantitative topographic analysis of visual evoked potentials in photosensitive epilepsy (Matsuo), 120A
- subclinical absence in tonic-clonic epilepsy (Keilson), 148A
- use of ethosuximide in epileptic falls (Snead and Hosey), 427A
- Epilepsy, surgery**
- chronically implanted subdural electrodes in the evaluation for epilepsy surgery in children and adults (Wyllie et al), 420A
- multidisciplinary prediction of seizure relief from cortical resection surgery (Dodrill et al), 2
- Epilepsy, temporal lobe**
- basal temporal subdural electrodes in the evaluation of complex partial seizures (Lüders et al), 120A
- magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- Epstein-Barr virus**
- primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 98
- Erythrocytes**
- zinc in multiple sclerosis. II: correlation with disease activity and elevated plasma membrane-bound zinc in erythrocytes from patients with multiple sclerosis (Ho et al), 712
- Ethosuximide**
- differential sensitivity of inhibitory and excitatory pathways to ethosuximide and to electrical stimulation (Shibuya et al), 429A
- use of ethosuximide in epileptic falls (Snead and Hosey), 427A
- Ethylene oxide**
- evidence for central and peripheral neurological dysfunction in chronic ethylene oxide exposure (Estrin et al), 136A
- neurological manifestations of chronic ethylene oxide exposure (Ristow and Cornelius), 136A
- Evoked potentials**
- evaluation of patients with multiple sclerosis by evoked potentials and magnetic resonance imaging: a comparative study (Cutler et al), 645
- evoked potentials predict the outcome in a multiple sclerosis drug trial (Nuwer et al), 145A
- motor evoked potential as an operative monitoring tool (Levy and York), 147A
- Evoked potentials, auditory**
- brainstem auditory evoked potentials in bilirubin encephalopathy (Shapiro and Hecox), 138A
- brainstem auditory evoked responses (BAER), audiometry, and ototoxicity in children receiving cisplatin (Kovnar et al), 399A
- brainstem auditory evoked responses in children with brainstem glioma (Kovnar et al), 399A
- brainstem evoked potentials in the diagnosis of posterior fossa tumors in children (Baram et al), 398A
- developmental studies of brainstem auditory evoked potentials in jaundiced rats (Shapiro and Hecox), 395A
- long-latency evoked potential findings in demented and nondemented patients with Parkinson's disease (Goodin and Aminoff), 127A
- subclasses of event-related potentials: response-locked and stimulus-locked components (Goodin et al), 603
- Evoked potentials, somatosensory**
- effects of state and stimulus rate on short-latency somatosensory evoked potentials in infants (Willis), 411A
- use of spinal somatosensory evoked potentials in the diagnosis of tethered cord (Emerson et al), 443A
- Evoked potentials, visual**
- chronic cholestasis, not vitamin E deficiency, leads to abnormal visual evoked potentials, a reflection of neurological dysfunction (Norcross et al), 431A
- comparison between visual evoked potential testing and magnetic resonance imaging for early diagnosis of multiple sclerosis (Rolak et al), 147A
- focal spike-induced cerebral dysfunction is related to the after-coming slow wave (Shewmon and Erwin), 428A
- quantitative topographic analysis of visual evoked potentials in photosensitive epilepsy (Matsuo), 120A
- Eye diseases**
- diagnosis and treatment of unusual disorders of the chiasm (Kupersmith et al), 140A
- Eye movements**
- electrographic status epilepticus in fatal anoxic coma (Simon and Aminoff), 351
- oculomasticatory myorhythmia: a unique movement disorder occurring in Whipple's disease (Schwartz et al), 677
- spontaneous vertical eye movements in coma (Rosenberg), 635
- Eye neoplasms**
- neurofibromatosis and chiasmal glioma: reappraisal for future management (Aron et al), 399A
- surgical management of progressive visual loss in optic gliomas of childhood (Baram et al), 398A
- Facial muscles, pathology**
- treatment of essential blepharospasm, hemifacial spasm, and Meig's syndrome with botulinum toxin (Buckley), 121A
- Facial paralysis**
- incidence, clinical features, and prognosis in Bell's palsy, Rochester, Minnesota, 1968-1982 (Karusic et al), 622
- Fasciculus gracilis**
- degeneration of the fasciculus gracilis in patients with AIDS (Rance et al), 142A
- Fibroblasts**
- cultured human skin fibroblasts and cerebral oxidative metabolic defects: normative data and Leigh's syndrome (De Vivo et al), 423A
- Fingers**
- cortical potentials related to voluntary and passive finger movements recorded from subdural electrodes in humans (Lee et al), 32
- Fluphenazine**
- haloperidol, fluphenazine, and clonidine in the treatment of Tourette's syndrome (Singer et al), 438A
- Foix-Chavany-Marie syndrome**
- developmental Foix-Chavany-Marie syndrome in identical twins (Graff-Radford et al), 632
- GABA**
- elevated γ -aminobutyric acid level in striatal but not extrastriatal brain regions in Parkinson's disease: correlation with striatal dopamine loss (Kish et al), 26

- Galactosylceramides**
remyelination follows antibody-induced central nervous system demyelination (Sergott et al), 94
- Gamma-aminobutyric acid.** *See* GABA
- Ganglia, spinal**
glial bundle formation in spinal roots following experimental neuronopathy (Yamamoto et al), 267
preferential loss of large lumbar primary sensory neurons in carcinomatous sensory neuropathy (Ohnishi and Ogawa), 102
subacute sensory neuronopathy secondary to dorsal root ganglionitis in primary Sjögren's syndrome (Malinow et al), 535
- Gastroesophageal reflux**
evidence of vestibular dysfunction in infants with gastroesophageal reflux (Eviatar and Angelides), 443A
- Gaucher's disease**
type 2 and type 3 Gaucher disease: a morphological and biochemical study (Kaye et al), 223
- Genes**
an atypical form of Huntington's disease is inherited at the known Huntington's disease gene locus (Koven et al), 148A
- Gerstmann's syndrome**
amyloid plaques in Creutzfeldt-Jakob disease stain with prion protein antibodies (Kitamoto et al), 204
Gerstmann-Sträussler-Scheinker disease: autopsy study of a familial case (Vinters et al), 540
posterior cortical dementia (Benson), 127A
- Gilles de la Tourette's disease**
clonidine in Tourette's syndrome: double-blind objective study (Goetz et al), 151A
effects of naltrexone in Tourette's syndrome (Sandyk et al), 437A
electrocardiographic changes during haloperidol and pimozone treatment of Tourette's disorder (Fulop et al), 437A
haloperidol, fluphenazine, and clonidine in the treatment of Tourette's syndrome (Singer et al), 438A
naloxone ameliorates compulsive touching behavior and tics in Tourette's syndrome (Sandyk et al), 437A
- Glial bundle**
glial bundle formation in spinal roots following experimental neuronopathy (Yamamoto et al), 267
- Glioma**
brainstem auditory evoked responses in children with brainstem glioma (Kovnar et al), 399A
demonstration of neuron-specific enolase in nonneuronal tumors using a specific monoclonal antibody (Cras et al), LETTER, 106
effect of differentiation inducers on growth characteristics of human glioblastoma cell lines (Geder et al), 140A
reoperation for malignant gliomas (Zee et al), 138A
surgical management of progressive visual loss in optic gliomas of childhood (Baram et al), 398A
- Globus pallidus**
bilateral lucency of the globus pallidus complicating methylmalonic acidemia (Korf et al), 364
vasopressin in Alzheimer's disease: a study of postmortem brain concentrations (Mazurek et al), 665
- Glucose**
cerebral glucose utilization increased during rapid eye movement sleep (Abrams et al), 401A
effect of phenobarbital on local cerebral glucose utilization in hypoxic newborn puppies (Pasternak and Wallace), 435A
patterns of local cerebral metabolic rates for glucose in children with psychomotor retardation determined with positron emission tomography (Chugani et al), 425A
- Glucose, metabolism**
cerebral blood flow and glucose metabolism in hepatic encephalopathy (Lockwood et al), 145A
glucose metabolism and rate constants in Alzheimer's disease examined with dynamic PET scan (Fukuyama et al), 125A
increased glucose metabolism causes cerebral acidosis during hypoxia (Lockwood et al), 155A
positron emission tomographic measurement of regional cerebral metabolic rate for glucose and blood flow in vegetative and locked-in patients (Levy et al), 122A
reduced cerebral glucose metabolism and increased brain capillary permeability following high-dose methotrexate chemotherapy: a positron emission tomographic study (Phillips et al), 139A
- Glucosylceramides**
type 2 and type 3 Gaucher disease: a morphological and biochemical study (Kaye et al), 223
- Glutamates**
effects of carbamazepine and its derivatives on the glutamate receptor in the central nervous system of the rat (Nadi), 148A
hippocampal glutamate receptors in Alzheimer's disease: implication for Down's syndrome (Geddes et al), 430A
role of glutamate in neuronal injury in perinatal brain (Silverstein et al), 418A
- Glutamic acid dehydrogenase**
biochemical and morphological changes of the brain in a patient dying of GDH-deficient olivopontocerebellar atrophy (Platakis and Smith), 152A
- Glycine**
intracerebroventricular glycine blocks myoclonus induced by p,p'-DDT in the rat (Truong et al), 149A
- Glycogen**
cloning and characterization of the fetal isoenzyme of glycogen phosphorylase (Gorin et al), 130A
- Glycogenosis IV**
glycogenosis IV: clinical and pathological findings in siblings (Gallen et al), 404A
- Glycolipids**
type 2 and type 3 Gaucher disease: a morphological and biochemical study (Kaye et al), 223
- Graft survival**
Purkinje and granule cells survive in cerebellar grafts implanted into hosts with genetically determined Purkinje or granule cell degeneration (Triarhou et al), 138A
- Great Britain**
comparative practice study of British and American neurology (Menken et al), 145A
- Hallervorden-Spatz syndrome**
pharmacological therapy of Hallervorden-Spatz syndrome: two cases responsive to benzotropine (Torch and Humphreys), 445A
- Haloperidol**
electrocardiographic changes during haloperidol and pimozone treatment of Tourette's disorder (Fulop et al), 437A
haloperidol, fluphenazine, and clonidine in the treatment of Tourette's syndrome (Singer et al), 438A
- Hamartoma**
magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- Headache**
headaches in subacute sinusitis (Faleck et al), 440A

- Hearing loss, sensorineural
sensorineural hearing loss in myotonic dystrophy (Wright et al), 134A
- Heart arrest
autonomic dysfunction in cardiac arrest survivors: evidence of severe vagal dysfunction (Serman et al), 158A
electrographic status epilepticus in fatal anoxic coma (Simon and Aminoff), 351
- Heart diseases
borderzone infarctions distal to internal carotid artery occlusion: prognostic implications (Bogousslavsky and Regli), 346
- Heart surgery, adverse effects
selective saccadic palsy caused by pontine lesions: clinical, physiological, and pathological correlations (Hanson et al), 209
- Hemiplegia
intercostal muscle activity in acute hemiplegia during spontaneous and voluntary breathing (Przedborski et al), 159A
Mill's progressive ascending paralysis—MRI study (Fisher), 153A
spastic pure motor monoplegia (Ashizawa et al), 638
- Hemorrhage
subependymal and pulmonary hemorrhages in the newborn: an analysis of 514 cases (Gregorios), 158A
- Herpes zoster
acute herpetic and postherpetic neuralgia: clinical review and current management (Portenoy et al), NEUROLOGICAL PROGRESS, 651
- Herpesvirus hominis
considerations about early diagnosis and prognosis in herpes simplex encephalitis (Risveglio et al), 144A
- Hippocampus
"anoxic penumbra" defined in vitro (Fairchild et al), 156A
hippocampal formation (Naidich et al), 430A
hippocampal glutamate receptors in Alzheimer's disease: implication for Down's syndrome (Geddes et al), 430A
perforant pathway changes and the memory impairment of Alzheimer's disease (Hyman et al), 472
rats with ischemia-induced hippocampal injury demonstrate dissociated memory impairment on 12-arm radial maze (Volpe et al), 154A
vasopressin in Alzheimer's disease: a study of postmortem brain concentrations (Mazurek et al), 665
- Hippocampus, transplantation
effect of neocortical embryonic transplants on seizure susceptibility (Holmes et al), 387A
- Histocompatibility antigens
expression of major histocompatibility complex antigens in cultured human oligodendroglia (Kim), 167A
- HLA antigens
familial narcolepsy and HLA antigens (Neely et al), 168A
HLA study of Japanese patients with Creutzfeldt-Jakob disease: significant association with HLA-DQw3 (Kuroda et al), 356
- HTLV I
absence of antibody to HTLV I and III in sera of Canadian patients with multiple sclerosis and chronic myelopathy (Rice et al), 533
- HTLV III
absence of antibody to HTLV I and III in sera of Canadian patients with multiple sclerosis and chronic myelopathy (Rice et al), 533
brain localization of LAV/HTLV-III infection in the AIDS dementia complex (Pumarola-Sune et al), 142A
- cerebral granulomatous angiitis associated with isolation of human T-lymphotropic virus type III from the central nervous system (Yankner et al), 362
choline acetyltransferase activity is reduced in the AIDS dementia complex (Navia et al), 142A
IgG specific for HTLV-III is synthesized intra-blood-brain barrier (BBB) in patients with neurological symptoms associated with AIDS and AIDS related complex (ARC) (Tourtellotte et al), 164A
immunohistochemical identification of HTLV-III antigen in brains of patients with AIDS (Gabuzda et al), 289
- Huntington's disease
an atypical form of Huntington's disease is inherited at the known Huntington's disease gene locus (Koven et al), 148A
correlates of early disability in Huntington's disease (Mayeux et al), 727
neuropeptide Y is increased in Huntington's disease (Beal et al), 152A
neuropeptides in neurological disease (Beal and Martin), NEUROLOGICAL PROGRESS, 547
PET scan investigations of Huntington's disease: cerebral metabolic correlates of neurological features and functional decline (Young et al), 296
- Hydrocephalus
seizures in children with myelomeningocele and/or hydrocephalus: frequency and prognosis (Noetzel and Blake), 425A
- Hydrocephalus, normal pressure
prognosis of dementia in normal-pressure hydrocephalus after a shunt operation (Thomsen et al), 304
- Hydroxymethylglutaryl CoA lyase
atypical presentation and neuropathological studies in 3-hydroxy-3-methylglutaryl-CoA lyase deficiency (Zoghbi et al), 367
- Hydroxytryptophan
successful treatment of action myoclonus with 5-hydroxytryptophan in cherry red spot-myoclonus syndrome (Gascon et al), 440A
- Hypertension
improved cognition after control of risk factors in multiinfarct dementia (Meyer et al), 158A
seizures and cerebral infarction in neonates with persistent pulmonary hypertension (Scher et al), 440A
- Hypoglycemia
how does hypoglycemia affect brain energy metabolism during prolonged neonatal seizures? (Young et al), 434A
- Hypotension
brain high-energy phosphate metabolism during neonatal seizures complicated by hypotension (Cowan et al), 409A
- Hypothalamus, pathology
Alzheimer's disease: alterations of aminergic-cholinergic synaptic markers in subregions of hypothalamus (Sparks et al), 124A
hypothalamic obesity is associated with an early rise in plasma insulin concentration (Segal et al), 443A
- Hypothyroidism
multidisciplinary approach to a new rodent model of congenital hypothyroidism (Stein et al), 402A
- IgG
measuring IgG production within the central nervous system (Schuller and Sagar), LETTER, 373; reply (Lefvert and Link), LETTER, 373

IgG (continued)

- modest serum contamination of cerebrospinal fluid (CSF) invalidates the calculation of intra-blood-brain barrier (BBB) IgG synthesis and intra-BBB albumin formation but not unique CSF oligoclonal IgG bands (Peter and Tourtellotte), 167A
- multiple sclerosis: relationship between suppressor cell function, IgG secretion in vitro, and the attacks of multiple sclerosis as studied by serial clinical and MRI examinations (Oger et al), 161A
- Ileum, surgery
 - botulism in a patient with jejunoileal bypass (Freedman et al), 641
- Immune system
 - immune responsiveness to iso- and allogeneic intraventricular neural implants in the mouse (Nicholas et al), 165A
- Immunodeficiency virus, human
 - HIV specific antibodies and antigens in the cerebrospinal fluid of children with acquired immunodeficiency syndrome (AIDS) and AIDS-related complex (ARC) (Epstein et al), 433A
- Immunoglobulins
 - cerebrospinal fluid immunoglobulins in childhood: normal values (Rust et al), 407A
 - immunoglobulin abnormalities in cerebrospinal fluid and blood over the course of lymphocytic meningoradiculitis (Bannwarth's syndrome) (Henriksson et al), 337
 - monoclonal IgM from a patient with neuropathy and chronic lymphocytic leukemia reacts with a conformational epitope formed by phosphatidic acid and gangliosides and binds to myelin and DNA (Freddo et al), 135A
 - polyneuropathy with polyclonal immunoglobulins (Igs): studies in 12 patients (Dalakas and Glasberg), 132A
- Immunoglobulins, kappa chain
 - cerebrospinal fluid kappa chain in multiple sclerosis: correlation with clinical and laboratory features (Rudick and Dunn), 123A
 - free kappa light chains in multiple sclerosis spinal fluid (Rudick et al), 63
- Immunoglobulins, light chain
 - free light chains in multiple sclerosis spinal fluid: unique electrofocusing characteristics (Bidlack et al), 166A
- Immunosuppressive agents
 - seven-year experience with plasmapheresis and immunosuppressive drug therapy in chronic progressive multiple sclerosis (Khatri et al), 165
- Infant, premature
 - subependymal and pulmonary hemorrhages in the newborn: an analysis of 514 cases (Gregorios), 158A
- Infection
 - does delay in acquiring childhood infections increase risk of multiple sclerosis? (Zhang et al), 165A
- Insulin
 - hypothalamic obesity is associated with an early rise in plasma insulin concentration (Segal et al), 443A
- Intelligence
 - correlates of early disability in Huntington's disease (Mayeux et al), 727
 - discontinuing antiepileptic drugs improves intellectual function (Vining et al), 389A
 - heterogeneity within the gifted: boys with higher IQ exhibit increased activity, impulsivity, and parenting problems (Shaywitz et al), 415A

Intercostal muscles

- intercostal muscle activity in acute hemiplegia during spontaneous and voluntary breathing (Przedborski et al), 159A

Interferons

- characterization of the cerebrospinal fluid pleocytosis induced by intrathecal administration of beta-interferon (Rose and Salazar), 166A
- immunological correlates of disease activity in multiple sclerosis patients treated with gamma interferon (Panitch et al), 124A
- interferon and multiple sclerosis (Lisak), LETTER, 273

Iododeoxyuridine

- effect of differentiation inducers on growth characteristics of human glioblastoma cell lines (Geder et al), 140A

Iopamidol

- iopamidol as a contrast medium for neuroradiologic studies in children (Swick and Wells), 438A

Iron, metabolism

- further observation on the AIDS encephalopathy: the role of iron metabolism (Kairam et al), 443

Jakob-Creutzfeldt syndrome

- amyloid plaques in Creutzfeldt-Jakob disease stain with prion protein antibodies (Kitamoto et al), 204
- Creutzfeldt-Jakob disease: clinical analysis of a consecutive series of 230 neuropathologically verified cases (Brown et al), 597
- decontamination of Creutzfeldt-Jakob disease agent (Taylor), LETTER, 749; reply (Committee on Health Care Issues, American Neurological Association), LETTER, 749
- familial myoclonic dementia masquerading as Creutzfeldt-Jakob disease (Little et al), 231
- HLA study of Japanese patients with Creutzfeldt-Jakob disease: significant association with HLA-DQw3 (Kuroda et al), 356
- ophthalmological precautions in Creutzfeldt-Jakob disease (Fross), LETTER, 748
- precautions in Creutzfeldt-Jakob disease (Austin), LETTER, 748
- sheep consumption: a possible source of spongiform encephalopathy in humans (Davanipour et al), 143A
- vacuolar change in the brains of patients with Alzheimer's disease and its relation to Creutzfeldt-Jakob disease (Smith et al), 126A

Jejunum, surgery

- botulism in a patient with jejunoileal bypass (Freedman et al), 641

Ketosis, diabetic

- risk factors for cerebral edema associated with diabetic ketoacidosis (Vlcek), 406A

Kidney, transplantation

- cyclosporin associated central nervous system toxicity in renal transplant patients (Lavenstein and Stewart), 441A
- epilepsy in childhood renal transplantation: a 20-year experience in 135 patients (Bates et al), 426A

Kidney failure, chronic

- epilepsy in childhood renal transplantation: a 20-year experience in 135 patients (Bates et al), 426A
- predictors of cognitive performance in infants with chronic renal failure (CRF) (Conry et al), 413A

Killer cells, natural

- Mollaret's meningitis: a case with increased circulating natural killer cells (Goldstein et al), 359

- multiple sclerosis: correlation of peripheral blood lymphocyte phenotype and natural killer cell activity with disease assessed clinically and by MRI (Kastrukoff et al), 164A
- Kindling**
effect of neocortical embryonic transplants on seizure susceptibility (Holmes et al), 387A
- L-644,711**
pharmacological prevention of astroglial swelling produced in gray matter by experimental brain injury (Barron et al), 144A
- Labrador**
incidence and prevalence of multiple sclerosis in Newfoundland and Labrador, 1960-1984 (Pryse-Phillips), 323
- Labyrinth diseases**
evidence of vestibular dysfunction in infants with gastroesophageal reflux (Eviatar and Angelides), 443A
- Language disorders**
motor function in school age children with developmental language disorders (Wiznitzer et al), 413A
nondextrality and autoimmune disorders are not more prevalent among relatives of language impaired children: a prospective study (Urien), 415A
- Lasers**
peripheral nerve damage, repair, and reconstruction: laser or razor? (de la Torre et al), 144A
- Laterality**
nondextrality and autoimmune disorders are not more prevalent among relatives of language impaired children: a prospective study (Urien), 415A
significance of incongruent hand skill and hand preference in children (Kytja and Voeller), 414A
sinistrality and risk for immune diseases and learning disorders: a pleiotropic gene effect? (Kinsbourne), 416A
- Learning**
carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
- Learning disorders**
developmental aspects of learning operant autoshaped behavior in rats (Lipton et al), 416A
sinistrality and risk for immune diseases and learning disorders: a pleiotropic gene effect? (Kinsbourne), 416A
- Lectins**
lectins as markers of developing human cerebellar cortex (DeGrauw et al), 390A
- Leigh's disease**
cultured human skin fibroblasts and cerebral oxidative metabolic defects: normative data and Leigh's syndrome (De Vivo et al), 423A
cytochrome oxidase deficiency in Leigh's syndrome (Servidei et al), 400A
magnetic resonance imaging in the early diagnosis of adult Leigh's disease (Kolkin et al), 153A
- Leukemia, lymphocytic**
cell surface markers for diagnosis of central nervous system involvement in lymphoproliferative diseases (Ernerudh et al), 610
monoclonal IgM from a patient with neuropathy and chronic lymphocytic leukemia reacts with a conformational epitope formed by phosphatidic acid and gangliosides and binds to myelin and DNA (Freddo et al), 135A
- Leukocytes**
cell surface markers for diagnosis of central nervous system involvement in lymphoproliferative diseases (Ernerudh et al), 610
- Leukodystrophy, metachromatic**
cerebrospinal fluid sulfatides and cerebroside in metachromatic leukodystrophy (Kaye et al), 424A
- Leukoencephalopathy, progressive multifocal**
progressive multifocal leukoencephalopathy in patients with acquired immune deficiency syndrome: study of the infection by in situ hybridization methods (Greenlee and Stroop), 141A
- Levodopa**
age of onset of dementia in Parkinson's and Alzheimer's disease and the role of levodopa (Gandy et al), 150A
comparison of mortality in early versus later levodopa treatment in Parkinson's disease (Diamond et al), 120A
inhibition of L-[¹⁸F]fluorodopa uptake into human brain by amino acids demonstrated by positron emission tomography (Leenders et al), 258
progression of Parkinson's disease in patients not treated with levodopa (Goetz et al), 148A
sinemet CR4 in the treatment of responsive fluctuations in Parkinson's disease (Cedarbaum et al), 121A
- Levodopa, administration**
duodenal delivery of levodopa for on-off fluctuations in parkinsonism: preliminary observations (Kurlan et al), 262
- Lewy bodies**
locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
- Limbic system**
developmental aspects of learning operant autoshaped behavior in rats (Lipton et al), 416A
prolactin in partial epilepsy: an indicator of limbic seizures (Sperling et al), 716
- Linkage (genetics)**
linkage studies in spinocerebellar ataxia (SCA) (Zoghbi et al), 401A
- Lipids, metabolism**
type I lipid storage myopathy with carnitine deficiency presenting initially as a proximal polyneuropathy (Vuckovich), 404A
- Lipodystrophy, intestinal**
oculomasticatory myorhythmia: a unique movement disorder occurring in Whipple's disease (Schwartz et al), 677
- Lipomatosis**
encephalocraniocutaneous lipomatosis (Fishman), 439A
- Lipoproteins, HDL**
role of macrophages' receptor-mediated conversion of HDL₃ to lipid-rich and apoprotein E-containing HDL₂ for cholesterol processing (Yatsu and Alam), 160A
- Liver, transplantation**
value of plasmapheresis in hepatic encephalopathy (Riviello et al), 442A
- Liver diseases**
cerebral blood flow and glucose metabolism in hepatic encephalopathy (Lockwood et al), 145A
hepatic toxicity of valproic acid: do inborn errors of liver metabolism underlie hepatic fatalities in some children? (Thurston and Hauhart), 400A
- Locus ceruleus**
locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
- Lorazepam**
rectal administration of lorazepam (Graves et al), 429A

- Lumbar vertebrae**
schwannoma presenting as lumbar disc disease in an adolescent boy (Lahat et al), 643
- Lung diseases**
pulmonary dysfunction in multiple sclerosis patients with upper-extremity weakness (Smeltzer et al), 169A
- Lung neoplasms**
preferential loss of large lumbar primary sensory neurons in carcinomatous sensory neuropathy (Ohnishi and Ogawa), 102
- Lupus erythematosus, systemic**
superior sagittal sinus thrombosis and systemic lupus erythematosus (Shiozawa et al), LETTER, 272
systemic autoimmune manifestations in patients with multiple sclerosis (Aisen et al), 167A
- Lyme disease**
Lyme disease presenting as mononeuritis multiplex (Carosio et al), 135A
- Lymphocytes**
cholinergic muscarinic binding by human lymphocytes: changes with aging, antagonist treatment, and senile dementia of the Alzheimer type (Rabey et al), 628
DNA repair in lymphocytes from familial ALS patients and their offspring as estimated by the alkaline elution technique (Tandan et al), 134A
Mollaret's meningitis: a case with increased circulating natural killer cells (Goldstein et al), 359
multiple sclerosis: correlation of peripheral blood lymphocyte phenotype and natural killer cell activity with disease assessed clinically and by MRI (Kastrukoff et al), 164A
neuropeptide and neurohormone regulation of the autologous mixed lymphocyte response (Bell et al), 141A
- Lymphocytes, cytotoxic-T**
virus-specific cytotoxic T lymphocytes in multiple sclerosis (Goodman et al), 161A
- Lymphocytosis**
characterization of the cerebrospinal fluid pleocytosis induced by intrathecal administration of beta-interferon (Rose and Salazar), 166A
- Lymphoid tissue**
biochemical and morphological alterations of the sympathetic innervation of lymphoid tissue in experimental allergic encephalomyelitis (Konkol et al), 391A
- Lymphoid tissue, radiotherapy**
total lymphoid irradiation in chronic progressive multiple sclerosis (Cook et al), 162A
- Lymphoma**
cell surface markers for diagnosis of central nervous system involvement in lymphoproliferative diseases (Ernerudh et al), 610
primary central nervous system lymphoma in acquired immune deficiency syndrome: a clinical and pathological study (So et al), 566
primary central nervous system lymphoma related to Epstein-Barr virus in a patient with acquired immune deficiency syndrome (Rosenberg et al), 98
- Mandible**
another differential for mutism (McArthur and Moffatt), LETTER, 273
- Masticatory muscles**
oculomasticatory myorhythmia: a unique movement disorder occurring in Whipple's disease (Schwartz et al), 677
- Measles virus**
measles virus-specific T-cell lines: HLA restrictions and specificities (Richert et al), 163A
- Medulloblastoma**
factors impacting on neurocognitive outcome in long-term survivors of primitive neuroectodermal tumors/medulloblastoma (PNET-MB) (Packer et al), 396A
late recurrence of primitive neuroectodermal tumor/medulloblastoma (PNET-MB): clinical and pathological features (Ryan et al), 397A
optimal surgery and MOPP chemotherapy in infants with PNET of the posterior fossa (Baram et al), 423A
treatment of extraneural metastatic medulloblastoma with the combination of cyclophosphamide, adriamycin, and vincristine (Chamberlain and Levin), 398A
- Memory**
carotid surgery, cognitive function, and cerebral blood flow in patients with transient ischemic attacks (Hemmingsen et al), 13
- Memory disorders**
left thalamic infarction and disturbance of verbal memory: a clinicoanatomical study with a new method of computed tomographic stereotaxic lesion localization (Mori et al), 671
nerve growth factor and Alzheimer's disease (Hefti and Weiner), NEUROLOGICAL PROGRESS, 275
perforant pathway changes and the memory impairment of Alzheimer's disease (Hyman et al), 472
rats with ischemia-induced hippocampal injury demonstrate dissociated memory impairment on 12-arm radial maze (Volpe et al), 154A
vasopressin in Alzheimer's disease: a study of postmortem brain concentrations (Mazurek et al), 665
- Meninges**
cortical potentials related to voluntary and passive finger movements recorded from subdural electrodes in humans (Lee et al), 32
- Meningioma**
meningiomas and obesity reconsidered (Jacobs et al), LETTER, 376
- Meningitis**
risk factors for seizures in childhood bacterial meningitis (Snyder et al), 425A
- Meningitis, aseptic**
cell surface markers for diagnosis of central nervous system involvement in lymphoproliferative diseases (Ernerudh et al), 610
- Meningitis, Mollaret's**
Mollaret's meningitis: a case with increased circulating natural killer cells (Goldstein et al), 359
- Meningocele**
seizures in children with myelomeningocele and/or hydrocephalus: frequency and prognosis (Noetzel and Blake), 425A
- Meningoradiculitis, lymphocytic**
immunoglobulin abnormalities in cerebrospinal fluid and blood over the course of lymphocytic meningoradiculitis (Bannwarth's syndrome) (Henriksson et al), 337
- Menstruation**
precocious adrenarche causes right hemisphere dysfunction? (Nass and Baker), 416A
- Mental retardation**
corpus callosum resection in five patients with intractable seizures and mental retardation (Murphy et al), 389A
three brothers with type I hypotrophy, external ophthalmoplegia, and mental retardation (Lidov et al), 444A
withdrawal of sedative anticonvulsant drugs in persons with mental retardation: II. prospective controlled study (Coulter), 421A

- Mental status schedule**
clinical diagnosis of Alzheimer's disease: relative sensitivity of various mental status and neurological examination test items (Strub and Black), 129A
education, mental status errors, and prediction of dementia (Crystal et al), 127A
- Mercury poisoning**
measuring contrast sensitivity (Rizzo), LETTER, 374; reply (Kobayashi et al), LETTER, 374
- Mesencephalon**
effects of a series of structural analogues of MPTP on dopamine neurons in cultures of dissociated cells from rat embryo mesencephalon (Sanchez-Ramos et al), 141A
synapse elimination as the developmental process producing pairing of left and right medial habenula afferents in the rat interpeduncular nucleus (Lenn and Whitmore), 389A
- Metabolism, inborn errors**
hepatic toxicity of valproic acid: do inborn errors of liver metabolism underlie hepatic fatalities in some children? (Thurston and Hauhart), 400A
- Metallothionein**
transfection of human skeletal muscle cells with SV40 large T antigen gene coupled to a metallothionein promoter (Hurko et al), 573
- Methionine**
role of ^{11}C -L-methionine positron emission tomography (PET) in the care of children with brain tumors (O'Tuama et al), 422A
- Methotrexate**
acute high-dose methotrexate neurotoxicity in the rat (Phillips et al), 583
dexamethasone reverses high-dose methotrexate induced increase in regional brain capillary permeability in the rat (Phillips et al), 422A
intravenous high dose methotrexate increases regional brain capillary permeability in the rat (Phillips et al), 139A
phase I-II trial of preradiation high-dose intravenous methotrexate chemotherapy for newly diagnosed malignant childhood brain tumors (Allen et al), 424A
reduced cerebral glucose metabolism and increased brain capillary permeability following high-dose methotrexate chemotherapy: a positron emission tomographic study (Phillips et al), 139A
- Methyl phenyl tetrahydropyridine**
locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456
- Methylmalonic acid**
bilateral lucency of the globus pallidus complicating methylmalonic acidemia (Korf et al), 364
- Methylphenidate**
effects of methylphenidate during debrisoquin loading on plasma and urinary concentrations of monoamines and their metabolites in children with attention deficit disorder (Shaywitz et al), 416A
methylphenidate in therapeutic doses does not lower seizure threshold (McBride et al), 428A
- Methysergide**
treatment of infantile spasms with antiserotonergic and/or antiadrenergic drugs: preliminary results (Hrachovy et al), 387A
- Migraine**
acute confusional migraine in childhood (Janian et al), 433A
amitriptyline and nortriptyline plasma concentrations in the treatment of childhood migraines (Woody and Kearns), 432A
- Minerals**
dystonia, dementia, tissue edema, and cerebral mineralization: a study by magnetic resonance imaging (Gomez et al), 124A
- Mitochondria, muscle**
peripheral neuropathy associated with mitochondrial myopathy (Yiannikas et al), 249
- Mitogenic factors**
oligodendrocytes as accessory cells in T-cell mitogenesis (Cashman et al), 169A
- Monoamine oxidase**
monoamine metabolism in the evolution of infarction in ischemic striatum (Weinberger and Nieves-Rosa), 155A
- Mononeuritis multiplex**
Lyme disease presenting as mononeuritis multiplex (Carosio et al), 135A
- Monoparesis, pure motor**
spastic pure motor monoparesis (Ashizawa et al), 638
- Morphine**
cerebrospinal fluid pharmacokinetics of intrathecal morphine sulfate and D-Ala²-D-Leu⁵-enkephalin (Moulin et al), 218
- Mortality**
comparison of mortality in early versus later levodopa treatment in Parkinson's disease (Diamond et al), 120A
- Motor activity**
cortical potentials related to voluntary and passive finger movements recorded from subdural electrodes in humans (Lee et al), 32
motor function in school age children with developmental language disorders (Wiznitzer et al), 413A
- Motor neurons**
glial bundle formation in spinal roots following experimental neuronopathy (Yamamoto et al), 267
hemispherectomy in infancy enlarges the distribution of motor neurons in the remaining cerebral hemisphere (Huttenlocher et al), 418A
possible role of aluminum toxicity in atypical motor neuron disease (Ross et al), 130A
type I lipid storage myopathy with carnitine deficiency presenting initially as a proximal polyneuropathy (Vuckovich), 404A
- Movement disorders**
electrophysiological correlates of a paroxysmal movement disorder (Toro and Torres), 731
- MPTP. See methyl phenyl tetrahydropyridine**
- Multiple sclerosis**
absence of antibody to HTLV I and III in sera of Canadian patients with multiple sclerosis and chronic myelopathy (Rice et al), 533
activated suppressor cell dysfunction in chronic progressive multiple sclerosis (Antel et al), 164A
4-aminopyridine administered orally improves clinical signs in multiple sclerosis (Davis et al), 152A
analysis of suppressor cell function using T-cell lines in multiple sclerosis (Noronha et al), 167A
cellular regulation of the autologous mixed lymphocyte response in multiple sclerosis (Greenstein and Crisp), 168A
cerebrospinal fluid kappa chain in multiple sclerosis: correlation with clinical and laboratory features (Rudick and Dunn), 123A
cervical cord lesion detected by magnetic resonance imaging (Beall et al), 162A

Multiple sclerosis (*continued*)

- comparison between visual evoked potential testing and magnetic resonance imaging for early diagnosis of multiple sclerosis (Rolak et al), 147A
- CT periventricular hypodensity in multiple sclerosis: isotopic cisternography and clinical correlations (Volpi et al), 146A
- decrease of the suppressor-inducer T-cell subset in progressive multiple sclerosis (Hafler et al), 123A
- diagnostic value of cerebrospinal fluid anti-myelin basic protein in patients with multiple sclerosis (Warren and Catz), 20
- evaluation of patients with multiple sclerosis by evoked potentials and magnetic resonance imaging: a comparative study (Cutler et al), 645
- evoked potentials predict the outcome in a multiple sclerosis drug trial (Nuwer et al), 145A
- free kappa light chains in multiple sclerosis spinal fluid (Rudick et al), 63
- free light chains in multiple sclerosis spinal fluid: unique electrofocusing characteristics (Bidlack et al), 166A
- functional electrical stimulation in multiple sclerosis patients with chronic foot drop (Sears et al), 146A
- immunological correlates of disease activity in multiple sclerosis patients treated with gamma interferon (Panitch et al), 124A
- incidence and prevalence of multiple sclerosis in Newfoundland and Labrador, 1960-1984 (Pryse-Phillips), 323
- interferon and multiple sclerosis (Lisak), LETTER, 273
- Japanese multiple sclerosis and human T-cell lymphotropic retroviruses (Saida et al), 144A
- magnetic resonance findings, disability, and cognitive factors in multiple sclerosis (Huber et al), 170A
- measles virus-specific T-cell lines: HLA restrictions and specificities (Richert et al), 163A
- multiple sclerosis: cerebrospinal fluid T-cell lines show natural effector cell activity (Noronha et al), 168A
- multiple sclerosis: correlation of peripheral blood lymphocyte phenotype and natural killer cell activity with disease assessed clinically and by MRI (Kastrukoff et al), 164A
- multiple sclerosis: relationship between suppressor cell function, IgG secretion in vitro, and the attacks of multiple sclerosis as studied by serial clinical and MRI examinations (Oger et al), 161A
- preliminary trial of colchicine in chronic progressive multiple sclerosis (Weinreb et al), 165A
- pulmonary dysfunction in multiple sclerosis patients with upper-extremity weakness (Smeltzer et al), 169A
- serial immune evaluation of chronic progressive multiple sclerosis patients (Kerman et al), 166A
- seven-year experience with plasmapheresis and immunosuppressive drug therapy in chronic progressive multiple sclerosis (Khatri et al), 165
- spinal cord abnormalities without cerebral lesions: a magnetic resonance imaging study of demyelinating disease (Honig et al), 152A
- studies of immune complexes in patients with multiple sclerosis (Friedman and Zabriskie), 166A
- systemic autoimmune manifestations in patients with multiple sclerosis (Aisen et al), 167A
- total lymphoid irradiation in chronic progressive multiple sclerosis (Cook et al), 162A
- virus-specific cytotoxic T lymphocytes in multiple sclerosis (Goodman et al), 161A

zinc in multiple sclerosis. II: correlation with disease activity and elevated plasma membrane-bound zinc in erythrocytes from patients with multiple sclerosis (Ho et al), 712

Multiple sclerosis, occurrence

does delay in acquiring childhood infections increase risk of multiple sclerosis? (Zhang et al), 165A

Muscle cramp

abnormal xenon 133 muscle blood flow in the syndrome of muscle aches, cramps, and pain (Fries et al), 136A

Muscle proteins

effect of testosterone on muscle protein synthesis in myotonic dystrophy (Griggs et al), 590

Muscles, blood supply

abnormal xenon 133 muscle blood flow in the syndrome of muscle aches, cramps, and pain (Fries et al), 136A

Muscles, surgery

effect of muscle biopsy on leg strength in children: a retrospective and prospective study (Pearson et al), 403A

Muscular atrophy

dicarboxylic aciduria in an infant with spinal muscular atrophy (Kelley and Sladky), 734

epidemiology of spinal muscular atrophy type I in Israel (Amit et al), 405A

post-polio muscular atrophy (PPMA): clinical and electrophysiological criteria (Baruah), 131A

rapidly progressive autosomal dominant scapulohumeral form of spinal muscular atrophy (Jansen et al), 538

Muscular diseases

progressive and episodic weakness of the lower extremity in carotid occlusive disease (Yanagihara and Sundt), 153A

Muscular dystrophy

adult-onset autosomal dominant limb-girdle muscular dystrophy (Chutkow et al), 240

membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50

new DNA probe tightly linked to myotonic muscular dystrophy (Roses et al), 137A

pseudohypertrophic muscular dystrophy in females (Marks et al), 405A

Mutism

another differential for mutism (McArthur and Moffatt), LETTER, 273

Myasthenia, Lambert-Eaton

immunolocalization of Lambert-Eaton myasthenic syndrome IgG to the presynaptic membrane active zone (Fukuoka et al), 123A

Myasthenia gravis

characterization of antibodies to acetylcholinesterase in serum from patients with myasthenia gravis (Keesey et al), 132A

pathogenetic effects of antiacetylcholine receptor antibody in myasthenia gravis: analysis by monoclonal antibody (Gomez and Richman), 163A

pathophysiology of penicillamine-induced myasthenia gravis (Kuncl et al), 740

prognosis of thymoma and myasthenia gravis (Niakan et al), 134A

treatment of myasthenic crisis in very young children (Snead et al), 404A

Myelin basic proteins. *See* Encephalitogenic basic proteins

Myelin proteins

epitopes of immunoreactive myelin basic protein in human cerebrospinal fluid (Whitaker et al), 329

immunoreactive myelin basic protein in cerebrospinal fluid

- of patients with peripheral neuropathies (Cornblath et al), 370
- myelin proteolipid protein induces experimental allergic encephalomyelitis (Trotter and Clark), 165A
- Myelin sheath**
- evidence for a pathogenic role of macrophage-derived toxic oxygen species in experimental allergic neuritis (Hartung et al), 167A
- myelination in Down's syndrome brains (pre- and post-natal maturation) and some clinical-pathological correlations (Wisniewski and Schmidt-Sidor), 429A
- Myelin sheath, physiology**
- remyelination follows antibody-induced central nervous system demyelination (Sergott et al), 94
- Myelography**
- early detection and treatment of spinal epidural metastases: the role of myelography (Rodichok et al), 696
- Myocardial infarction**
- cerebrovascular disease associated with echocardiographic documented focal segmental hypokinesia and remote myocardial infarction: does a causal relation exist? (Jones et al), 159A
- Myoclonus**
- familial myoclonic dementia masquerading as Creutzfeldt-Jakob disease (Little et al), 231
- intracerebroventricular glycine blocks myoclonus induced by p,p'-DDT in the rat (Truong et al), 149A
- oculomasticatory myorhythmia: a unique movement disorder occurring in Whipple's disease (Schwartz et al), 677
- successful treatment of action myoclonus with 5-hydroxytryptophan in cherry red spot-myoclonus syndrome (Gascon et al), 440A
- Myofibrils, metabolism**
- differential expression of the differentiation antigen 4F2 in developing and diseased human muscle in vivo (Specht and Brown), 403A
- Myositis**
- polymyositis, viruses, and immunodeficiency: a distinct association (Dalakas et al), 142A
- Myotonia atrophica**
- effect of testosterone on muscle protein synthesis in myotonic dystrophy (Griggs et al), 590
- sensorineural hearing loss in myotonic dystrophy (Wright et al), 134A
- Naloxone**
- naloxone ameliorates compulsive touching behavior and tics in Tourette's syndrome (Sandyk et al), 437A
- Naltrexone**
- effects of naltrexone in Tourette's syndrome (Sandyk et al), 437A
- elevated CSF beta-endorphins in apnea: treatment with naltrexone (Myer et al), 408A
- Narcolepsy**
- familial narcolepsy and HLA antigens (Neely et al), 168A
- Narcotics, poisoning**
- internuclear ophthalmoplegia with narcotic overdosage (El-Mallakh), LETTER, 107
- Neck muscles, pathology**
- floppy head syndrome (Lange et al), 133A
- Necrosis**
- antenatal white matter necrosis (Bejar et al), 436A
- Neoplasm metastasis**
- distribution of brain metastases (Delattre et al), 138A
- early detection and treatment of spinal epidural metastases: the role of myelography (Rodichok et al), 696
- Neoplasm recurrence, local**
- late recurrence of primitive neuroectodermal tumor/medulloblastoma (PNET-MB): clinical and pathological features (Ryan et al), 397A
- Neoplasms**
- anticerebellar antibodies in sera of patients with paraneoplastic cerebellar degeneration: studies of antibody specificity and response to plasmapheresis (Greenlee et al), 139A
- cerebrospinal fluid pharmacokinetics of intrathecal morphine sulfate and D-Ala²-D-Leu⁵-enkephalin (Moulin et al), 218
- smoking, cancer, and Parkinson's disease (Barbeau et al), LETTER, 105
- Nerve fibers**
- demyelinated motor and sensory fibers: differential effects on 4-aminopyridine (Bowe et al), 137A
- evidence for the generation in the adult rat dentate gyrus of neurons that extend axonal projections (Trice and Stanfield), 392A
- Nerve growth factors**
- astrocyte responses to growth factors (Huff and Snodgrass), 421A
- comparison of the growth-associated protein, GAP-43, in perinatal and postnatal sympathetic neurons regenerating in culture (Johnson et al), 420A
- glial growth factor-like activity in Schwann cell tumors (Brookes et al), 317
- nerve growth factor and Alzheimer's disease (Hefti and Weiner), NEUROLOGICAL PROGRESS, 275
- nerve growth factor and cholinergic differentiation in the developing corpus striatum (Mobley et al), 419A
- Nerve regeneration**
- glial bundle formation in spinal roots following experimental neuronopathy (Yamamoto et al), 267
- Nerve tissue proteins**
- comparison of the growth-associated protein, GAP-43, in perinatal and postnatal sympathetic neurons regenerating in culture (Johnson et al), 420A
- localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496
- neuropeptide Y immunoreactivity is reduced in cerebral cortex in Alzheimer's disease (Beal et al), 282

- Parasympathomimetics**
- cholinergic muscarinic binding by human lymphocytes: changes with aging, antagonist treatment, and senile dementia of the Alzheimer type (Rabey et al), 628
- Parkinson's disease**
- age of onset of dementia in Parkinson's and Alzheimer's disease and the role of levodopa (Gandy et al), 150A
- comparison of mortality in early versus later levodopa treatment in Parkinson's disease (Diamond et al), 120A
- control of the "on-off" phenomenon with dietary manipulation (Pincus and Barry), 149A
- duodenal delivery of levodopa for on-off fluctuations in parkinsonism: preliminary observations (Kurlan et al), 262
- elevated γ -aminobutyric acid level in striatal but not extrastriatal brain regions in Parkinson's disease: correlation with striatal dopamine loss (Kish et al), 26
- endocrine pancreas in amyotrophic lateral sclerosis and Parkinson's disease (Davis et al), 153A
- intellectual changes in asymptomatic MPTP exposed subjects (Stern et al), 170A
- locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
- long-latency evoked potential findings in demented and nondemented patients with Parkinson's disease (Goodin and Aminoff), 127A
- magnetic resonance imaging of the midbrain in Parkinson's disease (Duguid et al), 744
- monoaminergic systems in Alzheimer's and Parkinson's diseases (D'Amato et al), 129A
- neuropeptides in neurological disease (Beal and Martin), NEUROLOGICAL PROGRESS, 547
- Parkinson's disease (Richardson), EDITORIAL, 447
- Parkinson's disease: nigral receptor changes support peptidergic role in nigrostriatal modulation (Uhl et al), 194
- prevalence and risk of dementia in idiopathic Parkinson's disease (Mayeux et al), 128A

Parkinson's disease (*continued*)

- progression of Parkinson's disease in patients not treated with levodopa (Goetz et al), 148A
 - reductions in corticotropin-releasing factor-like immunoreactivity in cerebral cortex in Alzheimer's disease, Parkinson's disease, and progressive supranuclear palsy (Whitehouse et al), 125A
 - relationship of serotonin to depression in Parkinson's disease (Mayeux et al), 149A
 - saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456
 - sinemet CR4 in the treatment of responsive fluctuations in Parkinson's disease (Cedarbaum et al), 121A
 - smoking, cancer, and Parkinson's disease (Barbeau et al), LETTER, 105
 - spiperone binding and dopamine levels in the striatum of MPTP treated monkeys (Alexander et al), 149A
 - stroke and Parkinson's disease (Bahamon et al), 150A
- ## Penicillamine
- D-penicillamine initiates a T-cell response to acetylcholine receptor (Penn et al), 162A
 - pathophysiology of penicillamine-induced myasthenia gravis (Kuncl et al), 740
- ## Peptides
- vasoactive intestinal peptide immunoreactivity in Alzheimer cerebral cortex (Mazurek et al), 126A
- ## Perfusion, regional
- cerebral perfusion in presenile and senile Alzheimer's disease (Prohovnik et al), 127A
- ## Periodic acid-Schiff reaction
- PAS-positive granules in childhood ependymomas: a clinicopathological study (Taylor et al), 397A
- ## Peripheral nerve diseases
- electrophysiological study of autonomic dysfunction in peripheral neuropathy (Khalil et al), 136A
 - evidence for central and peripheral neurological dysfunction in chronic ethylene oxide exposure (Estrin et al), 136A
 - immunoreactive myelin basic protein in cerebrospinal fluid of patients with peripheral neuropathies (Cornblath et al), 370
 - peripheral nervous system in neonatal adrenoleukodystrophy (Nigro et al), 445A
 - reflex sympathetic dystrophy in nontraumatic peripheral neuropathies and correlation with the three-phase bone scan (Barohn et al), 134A
- ## Peripheral nerves
- motor evoked potential as an operative monitoring tool (Levy and York), 147A
 - peripheral nerve damage, repair, and reconstruction: laser or razor? (de la Torre et al), 144A
- ## Periventricular leukomalacia
- antenatal white matter necrosis (Bejar et al), 436A
 - cavitary periventricular leukomalacia: diagnosis, clinical course, and long-term neurological outcome (White et al), 436A
- ## Peroneal nerve
- functional electrical stimulation in multiple sclerosis patients with chronic foot drop (Sears et al), 146A
- ## Peroxisomal disorders
- phenotypic ranges of generalized peroxisomal disorders (Naidu et al), 406A
- ## Phenobarbital
- changes in epileptic spike configuration associated with attainment of seizure control (Frost et al), 723
 - effect of phenobarbital on local cerebral glucose utilization

in hypoxic newborn puppies (Pasternak and Wallace), 435A

very-high-dose phenobarbital for control of refractory status epilepticus (Crawford et al), 426A

PNET-MB. See Medulloblastoma

Poliomyelitis

post-polio muscular atrophy (PPMA): clinical and electrophysiological criteria (Baruah), 131A

Poliovirus

clearance of virus during a persistent poliovirus infection of the mouse central nervous system with antiviral chemotherapy (Jubelt et al), 143A

Polyradiculoneuritis

chronic nephrotoxicity complicating cyclosporine treatment of chronic inflammatory demyelinating polyradiculoneuropathy (Kolkin et al), 146A

Guillain-Barre syndrome complicating typhoid fever (Berger et al), LETTER, 649

Pons

selective saccadic palsy caused by pontine lesions: clinical, physiological, and pathological correlations (Hanson et al), 209

Portagen diet

familial mitochondrial myopathy responsive to portagen diet (Patten), 133A

Postoperative complications

selective saccadic palsy caused by pontine lesions: clinical, physiological, and pathological correlations (Hanson et al), 209

Prader-Willi syndrome

Prader-Labhart-Willi syndrome and birth asphyxia: cause versus susceptibility (Wharton and Bresnan), 438A

Prednisone

prospective study of outcome of infants with infantile spasms treated during controlled studies of ACTH and prednisone (Glaze et al), 419A

Progressive supranuclear palsy

atypical presentation of progressive supranuclear palsy (Campbell-Taylor), LETTER, 375; reply (Davis et al), LETTER, 375

Prolactin

prolactin in partial epilepsy: an indicator of limbic seizures (Sperling et al), 716

Prostaglandins

prostaglandin release from asphyxiated neonatal brain (Ment et al), 410A

Psychological tests

multidisciplinary prediction of seizure relief from cortical resection surgery (Dodrill et al), 2

Psychotic disorders

disintegrative psychosis of childhood (Bergia and Rosman), 418A

Putamen

elevated γ -aminobutyric acid level in striatal but not extrastriatal brain regions in Parkinson's disease: correlation with striatal dopamine loss (Kish et al), 26

Pyruvate carboxylase

pyruvate carboxylase deficiency presenting with acute exacerbation after the use of ACTH for infantile spasms (Rutledge et al), 401A

Q fever

encephalitis caused by *Coxiella burnetii* (Brooks et al), 91

Radiotherapy

postoperative chemotherapy and delayed irradiation in children less than 36 months of age with malignant brain tumors (Duffner et al), 424A

Receptors, antigen, T-cell

Japanese encephalitis: identification of inflammatory cells in cerebrospinal fluid (Johnson et al), 691

Receptors, cholinergic

nerve growth factor and cholinergic differentiation in the developing corpus striatum (Mobley et al), 419A

pathogenetic effects of antiacetylcholine receptor antibody in myasthenia gravis: analysis by monoclonal antibody (Gomez and Richman), 163A

Receptors, cholinesterase

D-penicillamine initiates a T-cell response to acetylcholine receptor (Penn et al), 162A

Receptors, dopamine

effects of a series of structural analogues of MPTP on dopamine neurons in cultures of dissociated cells from rat embryo mesencephalon (Sanchez-Ramos et al), 141A

Receptors, sensory

subacute sensory neuronopathy secondary to dorsal root ganglionitis in primary Sjögren's syndrome (Malinow et al), 535

Rectum

rectal administration of lorazepam (Graves et al), 429A

Regional blood flow

effects of xanthine derivatives on erythrocyte and plasma flow in focal brain ischemia (Izumiyama et al), 161A

new noninvasive measurement of regional cerebral blood flow in the neonate (Halloran et al), 411A

positron emission tomographic measurement of regional cerebral metabolic rate for glucose and blood flow in vegetative and locked-in patients (Levy et al), 122A

reduction of regional cerebral blood flow in patients with Down's syndrome (Melamed et al), 126A

Reoperation

reoperation for malignant gliomas (Zee et al), 138A

Respiration, artificial

long-term mechanical ventilation in infants with neuromuscular disease (Iannaccone and Guilfoile), 403A

Respiratory distress syndrome

neurological outcome following extracorporeal membrane oxygenation for severe newborn respiratory failure (Kotagal et al), 393A

Respiratory insufficiency

pulmonary dysfunction in multiple sclerosis patients with upper-extremity weakness (Smeltzer et al), 169A

Retrovirus infection

Japanese multiple sclerosis and human T-cell lymphotropic retroviruses (Saida et al), 144A

Rett's syndrome

cerebrospinal fluid biogenic amines and bioppterin in Rett's syndrome (Zoghbi et al), 433A

RNA, messenger

regional distribution of messenger RNA in postmortem human brain: an approach to understanding hereditary degenerative diseases of childhood (Wood et al), 391A

Saccades

contrapulsion of saccades and ipsilateral ataxia: a unilateral disorder of the rostral cerebellum (Ranalli and Sharpe), 311

saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456

saccadic eye movement dysfunction in Alzheimer's disease (Fletcher and Sharpe), 464

Saccades (*continued*)

selective saccadic palsy caused by pontine lesions: clinical, physiological, and pathological correlations (Hanson et al), 209

Sarcolemma

skinned fiber studies of patients with periodic paralysis (Ruff), 135A

Sarcoma

neurological dysfunction in children with sarcoma (Lewis et al), 397A

Sarcoplasmic reticulum

membrane defects in Duchenne dystrophy: protease affecting sarcoplasmic reticulum (Nagy and Samaha), 50
myopathy caused by a deficiency of Ca^{2+} -adenosine triphosphatase in sarcoplasmic reticulum (Brody's disease) (Karpati et al), 38

Schilder's disease. *See* Encephalitis periaxialis

Schwann cells

glial growth factor-like activity in Schwann cell tumors (Brookes et al), 317
schwannoma presenting as lumbar disc disease in an adolescent boy (Lahat et al), 643

Scrapie

amyloid plaques in Creutzfeldt-Jakob disease stain with prion protein antibodies (Kitamoto et al), 204
sheep consumption: a possible source of spongiform encephalopathy in humans (Davanipour et al), 143A
structural and immunochemical analysis of the intact scrapie agent protein and its cellular homologue (Bolton et al), 143A

Seasons

seasonal variation in stroke rates (Sobel et al), 157A

Seizures

absence seizures in children: differentiation of typical from atypical absences (Holmes et al), 420A
ACTH in the treatment of childhood seizures (Dooley et al), 388A
adverse effects of carbamazepine on attention in children with partial seizures (Rettig et al), 386A
brain high-energy phosphate metabolism during neonatal seizures complicated by hypotension (Cowan et al), 409A
cerebral metabolic effects of neonatal seizures measured with *in vivo* ^{31}P NMR spectroscopy (Younkin et al), 513
changes in epileptic spike configuration associated with attainment of seizure control (Frost et al), 723
corpus callosum resection in five patients with intractable seizures and mental retardation (Murphy et al), 389A
differential sensitivity of inhibitory and excitatory pathways to ethosuximide and to electrical stimulation (Shibuya et al), 429A
effect of neocortical embryonic transplants on seizure susceptibility (Holmes et al), 387A
effects of ACTH on seizure susceptibility in the developing brain (Holmes and Weber), 82
effects of mental status and fetal duration on the clinical visibility of EEG-proved neonatal seizures (Clancy et al), 411A
focal spike-induced cerebral dysfunction is related to the after-coming slow wave (Shewmon and Erwin), 428A
hemispheric brain damage in unilateral status epilepticus (Soffer et al), 737
high dose ACTH in infantile spasms and mixed seizure disorders of children: efficacy and plasma ACTH and cortisol levels (Snead et al), 419A

how does hypoglycemia affect brain energy metabolism during prolonged neonatal seizures? (Young et al), 434A

ictal versus nonictal behaviors in childhood: a video/EEG analysis (Duchowny et al), 387A

interobserver variability of the ILAE classification of seizures (Bodensteiner et al), 427A

low risk of seizure occurrence following a first unprovoked seizure in children and adolescents: a prospective study (Shinnar et al), 388A

methylphenidate in therapeutic doses does not lower seizure threshold (McBride et al), 428A

predictors of success for drug discontinuation following neonatal seizures (Brod et al), 434A

prolactin in partial epilepsy: an indicator of limbic seizure (Sperling et al), 716

risk factors for seizures in childhood bacterial meningitis (Snyder et al), 425A

seizures and cerebral infarction in neonates with persistent pulmonary hypertension (Scher et al), 440A

seizures during barbiturate withdrawal: relation to blood level (Theodore and Porter), 147A

seizures in children with myelomeningocele and/or hydrocephalus: frequency and prognosis (Noetzel and Blake), 425A

six unexpected deaths in patients receiving nitrazepam (Murphy et al), 426A

sleep apnea resembling seizures in olivopontocerebellar degeneration: a diagnostically confusing and treatable entity (Salazar-Grueso et al), 147A

subclinical absence in tonic-clonic epilepsy (Keilson), 148A

Serotonin

relationship of serotonin to depression in Parkinson's disease (Mayeux et al), 149A

Serum globulins

immunoglobulin abnormalities in cerebrospinal fluid and blood over the course of lymphocytic meningoradiculitis (Bannwarth's syndrome) (Henriksson et al), 337

Sinusitis

headaches in subacute sinusitis (Faleck et al), 440A

Sinus thrombosis

superior sagittal sinus thrombosis and systemic lupus erythematosus (Shiozawa et al), LETTER, 272

Sjögren's syndrome

subacute sensory neuropathy secondary to dorsal root ganglionitis in primary Sjögren's syndrome (Malinow et al), 535

Skeletal muscles

maternal muscle biopsy in severe neonatal centronuclear (myotubular) myopathy (Brenningstall and Marks), 405A
membrane potentials and cable properties of cultured human skeletal muscle cells (Iannaccone et al), 402A
myopathy caused by a deficiency of Ca^{2+} -adenosine triphosphatase in sarcoplasmic reticulum (Brody's disease) (Karpati et al), 38

transfection of human skeletal muscle cells with SV40 large T antigen gene coupled to a metallothionein promoter (Hurko et al), 573

Skull neoplasms

brainstem evoked potentials in the diagnosis of posterior fossa tumors in children (Baram et al), 398A

Sleep, REM

cerebral glucose utilization increased during rapid eye movement sleep (Abrams et al), 401A

- Sleep apnea syndrome**
sleep apnea resembling seizures in olivoponto-cerebellar degeneration: a diagnostically confusing and treatable entity (Salazar-Grueso et al), 147A
- Sleep disorders**
natural history of night terrors (DiMario and Emery), 440A
sleep disorders medicine and the child neurologist: experience in a sleep disorders center (Brown et al), 430A
- Smoking**
improved cognition after control of risk factors in multiinfarct dementia (Meyer et al), 158A
smoking, cancer, and Parkinson's disease (Barbeau et al), LETTER, 105
- Somatostatin**
neuropeptide Y immunoreactivity is reduced in cerebral cortex in Alzheimer's disease (Beal et al), 282
neuropeptides in neurological disease (Beal and Martin), NEUROLOGICAL PROGRESS, 547
Parkinson's disease: nigral receptor changes support peptidergic role in nigrostriatal modulation (Uhl et al), 194
widespread reduction of somatostatin-like immunoreactivity in the cerebral cortex in Alzheimer's disease (Beal et al), 489
- Spasms, infantile**
high dose ACTH in infantile spasms and mixed seizure disorders of children: efficacy and plasma ACTH and cortisol levels (Snead et al), 419A
prospective study of outcome of infants with infantile spasms treated during controlled studies of ACTH and prednisone (Glaze et al), 419A
pyruvate carboxylase deficiency presenting with acute exacerbation after the use of ACTH for infantile spasms (Rutledge et al), 401A
treatment of infantile spasms with antiserotonergic and/or antiadrenergic drugs: preliminary results (Hrachovy et al), 387A
- Spinal cord diseases**
agenesis of the corpus callosum in patients with spinal defects (Cochran and Koch), 439A
autoimmune noncarcinomatous sensory-motor neuronopathy with posterior column degeneration (Jaeckle et al), 140A
cervical cord lesion detected by magnetic resonance imaging (Beall et al), 162A
degeneration of the fasciculus gracilis in patients with AIDS (Rance et al), 142A
dysraphic lesions of the pediatric spine: magnetic resonance imaging (Brunberg et al), 392A
magnetic resonance imaging of childhood spinal cord disease (Packer et al), 406A
spinal cord abnormalities without cerebral lesions: a magnetic resonance imaging study of demyelinating disease (Honig et al), 152A
use of spinal somatosensory evoked potentials in the diagnosis of tethered cord (Emerson et al), 443A
- Spinal cord neoplasms**
early detection and treatment of spinal epidural metastases: the role of myelography (Rodichok et al), 696
schwannoma presenting as lumbar disc disease in an adolescent boy (Lahat et al), 643
- Spine**
epidemiology of spinal muscular atrophy type I in Israel (Amit et al), 405A
- Spiperone**
spiperone binding and dopamine levels in the striatum of MPTP treated monkeys (Alexander et al), 149A
- Status dysraphicus**
dysraphic lesions of the pediatric spine: magnetic resonance imaging (Brunberg et al), 392A
- Status epilepticus**
cerebrospinal fluid pleocytosis in childhood idiopathic status epilepticus (Woody et al), 427A
combined ^1H and ^{31}P nuclear magnetic resonance spectroscopic studies of bicuculline-induced seizures in vivo (Petroff et al), 185
electrographic status epilepticus in fatal anoxic coma (Simon and Aminoff), 351
hemispheric brain damage in unilateral status epilepticus (Soffer et al), 737
low morbidity and mortality of status epilepticus in children and adolescents (Maytal et al), 389A
pattern of recovery from barbiturate anesthesia for refractory status epilepticus (Lowenstein and Simon), 120A
rectal administration of lorazepam (Graves et al), 429A
very-high-dose phenobarbital for control of refractory status epilepticus (Crawford et al), 426A
- Stereotaxic techniques**
left thalamic infarction and disturbance of verbal memory: a clinicoanatomical study with a new method of computed tomographic stereotaxic lesion localization (Mori et al), 671
- Stroke. See Cerebrovascular diseases**
- Subarachnoid hemorrhage**
spontaneous subarachnoid hemorrhage in young adults (Biller et al), 154A
- Substance P**
localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496
- Substantia innominata**
neurofibrillary degeneration of cholinergic and noncholinergic neurons of the basal forebrain in Alzheimer's disease (Rasool et al), 482
- Substantia nigra**
locus ceruleus lesions and eosinophilic inclusions in MPTP-treated monkeys (Forno et al), 449
magnetic resonance imaging of the midbrain in Parkinson's disease (Duguid et al), 744
Parkinson's disease: nigral receptor changes support peptidergic role in nigrostriatal modulation (Uhl et al), 194
saccade responses to dopamine in human MPTP-induced parkinsonism (Hotson et al), 456
- Sudden infant death**
elevated beta-endorphin levels in infants at high risk for SIDS (Myer et al), 438A
- Sulfatides**
cerebrospinal fluid sulfatides and cerebroside in metachromatic leukodystrophy (Kaye et al), 424A
- Sulfonamides**
acute bilirubin encephalopathy in jaundiced rats treated with sulfonamide: timing of brainstem auditory evoked potential changes (Shapiro), 393A
- Suppressor cells**
activated suppressor cell dysfunction in chronic progressive multiple sclerosis (Antel et al), 164A
analysis of suppressor cell function using T-cell lines in multiple sclerosis (Noronha et al), 167A

Suppressor cells (*continued*)

- decrease of the suppressor-inducer T-cell subset in progressive multiple sclerosis (Hafler et al), 123A
- multiple sclerosis: relationship between suppressor cell function, IgG secretion *in vitro*, and the attacks of multiple sclerosis as studied by serial clinical and MRI examinations (Oger et al), 161A

Sympathetic nervous system

- comparison of the growth-associated protein, GAP-43, in perinatal and postnatal sympathetic neurons regenerating in culture (Johnson et al), 420A

Synapses

- synapse elimination as the developmental process producing pairing of left and right medial habenula afferents in the rat interpeduncular nucleus (Lenn and Whitmore), 389A

Synaptic membranes

- immunolocalization of Lambert-Eaton myasthenic syndrome IgG to the presynaptic membrane active zone (Fukuoka et al), 123A

Synaptic receptors

- distribution of neurotransmitter receptors in human fetal brain (Barks et al), 392A

Syncope

- syncope due to ventricular tachycardia and its relationship to cardiomyopathy, skeletal muscle myopathy, and carnitine metabolism (Smith et al), 439A

T lymphocytes

- adoptively transferred chronic experimental allergic encephalitis: changes in central nervous system T-cell phenotype and frequency of myelin basic protein reactive T-cells following relapse (Fallis et al), 164A
- analysis of suppressor cell function using T-cell lines in multiple sclerosis (Noronha et al), 167A
- cellular regulation of the autologous mixed lymphocyte response in multiple sclerosis (Greenstein and Crisp), 168A
- Japanese multiple sclerosis and human T-cell lymphotropic retroviruses (Saida et al), 144A
- measles virus-specific T-cell lines: HLA restrictions and specificities (Richert et al), 163A
- multiple sclerosis: cerebrospinal fluid T-cell lines show natural effector cell activity (Noronha et al), 168A
- oligodendrocytes as accessory cells in T-cell mitogenesis (Cashman et al), 169A

Tachycardia

- syncope due to ventricular tachycardia and its relationship to cardiomyopathy, skeletal muscle myopathy, and carnitine metabolism (Smith et al), 439A

Tarsal tunnel syndrome

- medial plantar neuropathy: a heretofore unrecognized mononeuropathy (Oh and Lee), 135A

Taxol

- taxol produces a predominantly sensory neuropathy (Lip-ton et al), 132A

Temporal arteries

- localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496

Temporal lobe

- prolactin in partial epilepsy: an indicator of limbic seizures (Sperling et al), 716

Testosterone

- effect of testosterone on muscle protein synthesis in myo-tonic dystrophy (Griggs et al), 590

Tetanus toxin

- nicking of tetanus toxin increases activity (Bergey et al), 137A

Tetrabenazine

- treatment of infantile spasms with antiserotonergic and/or antiadrenergic drugs: preliminary results (Hrachovy et al), 387A

Thalamic diseases

- familial myoclonic dementia masquerading as Creutzfeldt-Jakob disease (Little et al), 231
- left thalamic infarction and disturbance of verbal memory: a clinicoanatomical study with a new method of computed tomographic stereotaxic lesion localization (Mori et al), 671

Thymoma

- prognosis of thymoma and myasthenia gravis (Niakan et al), 134A

Thyrotropin

- double-blind crossover trial with TRH-T in inherited ataxias (Campanella et al), 151A

Thyrotropin releasing hormones

- autonomic hypersensitivity to thyrotropin releasing hormone (TRH) infusion in amyotrophic lateral sclerosis (ALS) patients with bulbar involvement (Brooks et al), 132A

Tomography, emission computed

- comparison of computed tomographic and positron emission tomographic findings in olivopontocerebellar atrophy (Gilman et al), 121A
- elevated brainstem blood flow in newborn infants: a positron emission tomography study (Altman et al), 436A
- glucose metabolism and rate constants in Alzheimer's disease examined with dynamic PET scan (Fukuyama et al), 125A
- inhibition of L-[¹⁸F]fluorodopa uptake into human brain by amino acids demonstrated by positron emission tomography (Leenders et al), 258
- magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- patterns of local cerebral metabolic rates for glucose in children with psychomotor retardation determined with positron emission tomography (Chugani et al), 425A
- PET scan investigations of Huntington's disease: cerebral metabolic correlates of neurological features and functional decline (Young et al), 296
- positron emission tomographic measurement of regional cerebral metabolic rate for glucose and blood flow in vegetative and locked-in patients (Levy et al), 122A
- quantitative study of the AIDS dementia complex using positron emission tomography and ¹⁸F-fluorodeoxyglucose (Moeller et al), 128A
- role of ¹¹C-L-methionine positron emission tomography (PET) in the care of children with brain tumors (O'Tuama et al), 422A
- single photon emission computed tomography with N-isopropyl (I-123) iodoamphetamine (IMP) in cerebrovascular disease (Saxena et al), 122A

Tomography, x-ray computed

- comparison of computed tomographic and positron emission tomographic findings in olivopontocerebellar atrophy (Gilman et al), 121A
- comparison of magnetic resonance imaging and CT scan findings in two sisters with juvenile neuronal ceroid lipofuscinosis (Boustany et al), 441A
- dementia, ventricular enlargement, and hypertension associated with periventricular hypodensity by computed tomography (Brott et al), 129A

- left thalamic infarction and disturbance of verbal memory: a clinicoanatomical study with a new method of computed tomographic stereotaxic lesion localization (Mori et al), 671
- magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- neurological manifestations in xeroderma pigmentosum (Mimaki et al), 70
- new and characteristic diagnostic features of periventricular leukomalacia on CT scan (Hill et al), 394A
- proton magnetic resonance imaging in ischemic cerebrovascular disease (Salgado et al), 502
- reclassification of acute stroke with nondiagnostic computed tomography and angiogram: infarction of undetermined cause in the NINCDS stroke data bank (Sacco et al), 157A
- structural determinants of electroencephalographic findings in acute hemispheric lesions (Schaal et al), 703
- Tourette's disease. *See* Gilles de la Tourette's disease
- Tremor
- caffeine and tremor (Koller et al), 151A
- Tuberous sclerosis
- magnetic resonance imaging in intractable partial epilepsy: correlative studies (Sperling et al), 57
- magnetic resonance imaging of tuberous sclerosis (Roach et al), 408A
- Twins, monozygotic
- developmental Foix-Chavany-Marie syndrome in identical twins (Graff-Radford et al), 645
- Typhoid
- Guillain-Barre syndrome complicating typhoid fever (Berger et al), LETTER, 649
- Ultrasonics
- common neuropathological lesions not visualized by cranial ultrasound in the newborn (Kairam et al), 392A
- evaluation of neonates during extracorporeal membrane oxygenation with EEG and cranial ultrasonography (Streletz et al), 412A
- hippocampal formation (Naidich et al), 430A
- ultrasound grading of severe intraventricular hemorrhage in the premature infant: a poor predictor of outcome (Roland et al), 409A
- United States
- comparative practice study of British and American neurology (Menken et al), 145A
- Urine
- dicarboxylic aciduria in an infant with spinal muscular atrophy (Kelley and Sladky), 734
- heterogeneity of clinical manifestations in 4-hydroxybutyric aciduria (Gibson et al), 141A
- Valproate
- adverse effects associated with long-term use of valproic acid in children (Maas et al), 429A
- hepatic toxicity of valproic acid: do inborn errors of liver metabolism underlie hepatic fatalities in some children? (Thurston and Hauhart), 400A
- significant clinical valproate toxicity due to interaction with acetylsalicylic acid (Goulden et al), 427A
- Vascular headache
- "vascular" headache in sickle cell disease (Pavlakis et al), 407A
- Vasculitis
- cerebral granulomatous angiitis associated with isolation of human T-lymphotropic virus type III from the central nervous system (Yankner et al), 362
- granulomatous angiitis of the central nervous system: a nonspecific reaction of diverse etiology (Younger et al), 157A
- Vasoactive intestinal peptide
- localization and effects of neuropeptide Y, vasoactive intestinal polypeptide, substance P, and calcitonin gene-related peptide in human temporal arteries (Jansen et al), 496
- Vasopressins
- vasopressin in Alzheimer's disease: a study of postmortem brain concentrations (Mazurek et al), 665
- Vercuronium
- core-like lesions with selective thick filament lysis: a reversible myopathy following prolonged paralysis with vecuronium (Danon and Carpenter), 133A
- Vertebral artery
- signs and symptoms in occlusive disease of the intracranial vertebral or basilar arteries (Caplan et al), 160A
- Vestibular apparatus
- evidence of vestibular dysfunction in infants with gastroesophageal reflux (Eviatar and Angelides), 443A
- Video games
- development of a videogame-based test of attention and impulsivity (Mitchell et al), 414A
- Video recording
- ictal versus nonictal behaviors in childhood: a video/EEG analysis (Duchowny et al), 387A
- Vincristine
- treatment of extraneural metastatic medulloblastoma with the combination of cyclophosphamide, adriamycin, and vincristine (Chamberlain and Levin), 398A
- Virus, murine
- cultured glial cells express Theiler's virus-associated antigen on their surfaces (Rodriguez et al), 143A
- Vision disorders
- surgical management of progressive visual loss in optic gliomas of childhood (Baram et al), 398A
- Visual perception
- measuring contrast sensitivity (Rizzo), LETTER, 374; reply (Kobayashi et al), LETTER, 374
- Vitamin E
- chronic cholestasis, not vitamin E deficiency, leads to abnormal visual evoked potentials, a reflection of neurological dysfunction (Norcross et al), 431A
- epidemiology of spinal muscular atrophy type I in Israel (Amit et al), 405A
- Warfarin
- complications of long-term anticoagulation (Petty et al), 156A
- Wechsler scales
- WISC-R subtest profiles and methylphenidate response in ADD (McBride and Klorman), 412A
- Werdnig-Hoffman disease. *See* Muscular atrophy
- Wernicke-Korsakoff syndrome
- three-dimensional mapping of local cerebral perfusion in two distinct types of alcoholic encephalopathy (Meyer et al), 155A
- Whipple's disease. *See* Lipodystrophy, intestinal
- WIN 51711
- clearance of virus during a persistent poliovirus infection of the mouse central nervous system with antiviral chemotherapy (Jubelt et al), 143A
- WR2721
- WR2721 as an adjunctive agent in chemotherapy for neuroblastoma (Tabachnik-Schor), 399A

- X chromosome
 - association of the fragile-X chromosome abnormality with infantile autism (Payton et al), 417A
 - infantile X-linked ataxia and deafness: a new entity? (Schmidley et al), 442A
 - X-linked neuropathy: gene localization with DNA probes (Fischbeck et al), 527
- Xanthine
 - effects of xanthine derivatives on erythrocyte and plasma flow in focal brain ischemia (Izumiyama et al), 161A
- Xanthomatosis
 - chronic demyelinating peripheral neuropathy in cerebrotendinous xanthomatosis (Argov et al), 89
- Xenon
 - abnormal xenon 133 muscle blood flow in the syndrome of muscle aches, cramps, and pain (Fries et al), 136A
- Xeroderma pigmentosum
 - neurological manifestations in xeroderma pigmentosum (Mimaki et al), 70
- Zebra body myopathy
 - congenital zebra body myopathy: a second case (Reyes et al), 390A
- Zinc
 - zinc in multiple sclerosis. II: correlation with disease activity and elevated plasma membrane-bound zinc in erythrocytes from patients with multiple sclerosis (Ho et al), 712
